

Pedestrian Bridge

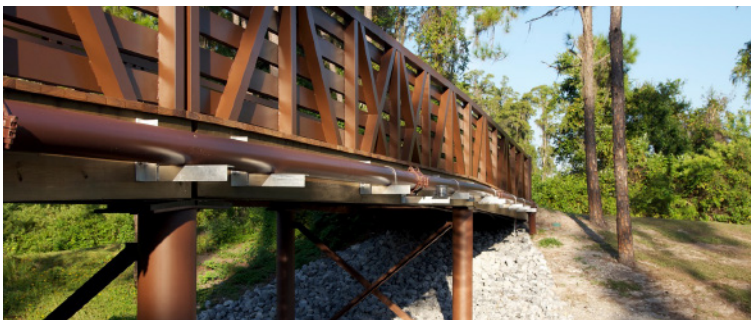

▶ Lake Buena Vista Golf Course | Orlando, FL | 2010

Project Partners:

Project for:
Disney's Lake Buena Vista Golf Course

Features:
10ft x 30ft Atlantis Truss
Custom Horizontal Rail
IPE Decking
UHMW Rub Rail / Fender

Products:
GatorBridge®

Project Summary

Disney's Lake Buena Vista Golf Course, rated an impressive four stars by Golf Digest, is one of the few courses that have hosted PGA Tour, LPGA Tour and USAGA events. Before adding a GatorBridge® to their course, a timber bridge was in its place. The timber bridge could not keep the modern, manicured aesthetic that matched the course atmosphere even with intensive maintenance programs. So GatorBridge® set off to design an aluminum bridge for golf cart and pedestrian traffic. The new golf cart bridge has all the benefits of aluminum including minimal maintenance, sturdy load capacity and modern design that fits with the natural surroundings. The bridge design is a version of our Atlantis Truss with Horizontal Rail. After fabrication, the entire golf course bridge was powder coated a custom shade of brown. Ipe decking and a protective UHMW rub rail finished the clean, natural look.
