

## MinePortal

A Connected Orebody Knowledge Platform

Achieve Optimal:

- ✓ Integration
- ✓ Analyzation
- ✓ Visibility

### Problem

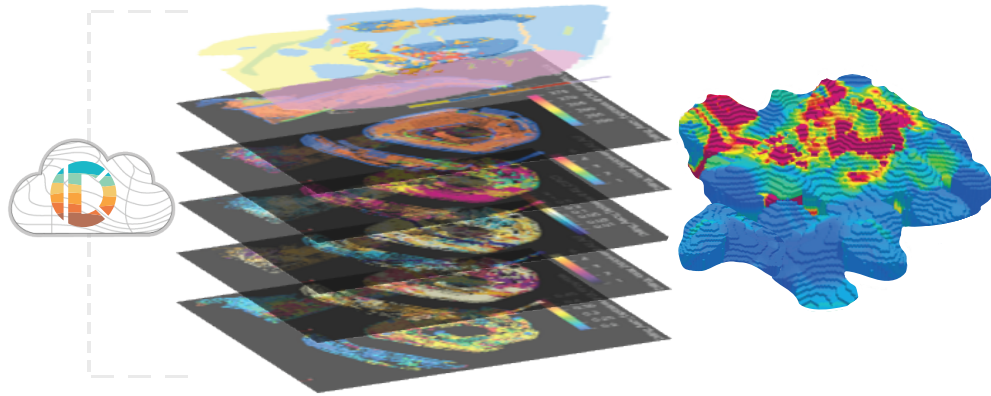

The pressures of competition, cost cutting, and optimizing productivity and throughput are driving a need for better and faster data analysis of a mine site's geology.

Costly and unplanned variations in delivered ore go unnoticed, and revenue suffers.

The volume of new data that needs to be analyzed to update orebody knowledge is overwhelming to handle.

### Solution

MinePortal connects and analyzes all orebody data. Our digital solutions enable mining teams to make better, faster production decisions that help downstream operations.

### Outcomes

• A continuous flow of new data enabling automation and analytical capabilities like never before

• More informed decision making from awareness of other department's strategies and outcomes

• A cloud-based collaboration space for all team members, onsite and remote

• Efficient access to fast answers and eliminated data redundancy

✓ Industry-Leading Integration Techniques

✓ Improved Decision Making

✓ Inspires Site-Wide Collaboration
