# Infrastructure and Sub-processors for WINDA

Published: May 14, 2020

## Scope

This documentation describes the infrastructure environment and sub-processors to GWO's provision of the services known as WINDA.

## Infrastructure – Customer Data Storage

Except in the scenarios described below, GWO owns or controls access to the infrastructure that GWO uses to store data submitted by Stakeholders to our services ("Customer Data"). Currently, the infrastructure hosted by GWO in the provisioning of the WINDA Services is located in Ireland and the Certificates are hosted in the United States of America.

The feature for sending e-mail via the WINDA Services uses the build in e-mail delivery services of WINDA and utilizes Amazon SES using the SES API (not SMTP).

The feature for sending e-mail through our Newsletter uses APSIS. Details on their GDPR Compliance can be found here <https://www.apsis.com/knowledge/gdpr>

Entity Name	Entity Type	Entity Country
Microsoft Ireland Operations Limited	Third-party hosting provider	<ul style="list-style-type: none"><li>Ireland</li></ul>
Amazon Web Services, Inc. ("AWS")	Third-party service provider	<ul style="list-style-type: none"><li>Germany</li></ul>
Netcompany Group A/S	Third-party programming and administering of WINDA	<ul style="list-style-type: none"><li>Denmark</li></ul>
QuickPay ApS	Third-party payment gateway	<ul style="list-style-type: none"><li>Denmark</li></ul>
Visma e-conomic A/S	Third-party invoicing gateway	<ul style="list-style-type: none"><li>Denmark</li></ul>
APSYS International AB	Third-party Email Marketing Company	<ul style="list-style-type: none"><li>Sweden</li></ul>

### Content Delivery Networks

WINDA utilizes content delivery networks (“CDNs”) to optimize content delivery. CDNs are commonly-used systems of distributed services that expedite the transmission of content. The following describes use of CDNs by certain features of WINDA.

CDN Used	Location	Description of CDN Services
Microsoft Azure	Ireland	<p>Content items to be served to subscribers or end-users, such as images or attachments uploaded to WINDA, may be stored with Microsoft Azure to expedite transmission. Information transmitted across Azure may be accessed by Azure to enable these functions.</p> <p>Further information about security provided by Microsoft Azure is available from the <a href="#">Azure Security website</a> including <a href="#">Microsoft Azure security fundamentals documentation</a>.</p>
