

Measurements Required for Audition Registration

You will need measurements to complete registration process. Please do NOT leave these fields blank during registration since they are required.

We realize that sizing may be sensitive for some dancers, but measurements and weight are extremely important for costume sizing. We have dancers in all sizes, and the information is not used in any way to discriminate between dancers.

Measurements will need to be entered in as whole numerical values when completing the registration process. Please use the image below to help assist you in measuring properly. Please use whole numbers (no decimals or fractions) and do not enter the unit of measurement ('', ''', feet, inches, lbs, #, pounds).

- Height (INCHES)
- Bust/Chest (INCHES)
- Waist (INCHES)
- Hips (INCHES)
- Weight (POUNDS)

Measurements must be true fit which means close to the body and not done through thick clothes. Dancers should not be wearing shoes when taking the height measurement.
