# 15 How to see a patient's blood sugar diary

Ref: CORP-052-01

## Task: View patient record so blood sugar diary can be reviewed

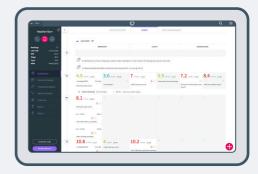

#### Step 1

Click on the patient's name from the **Current Patients** screen.

### Step 2

You will be taken to the patient's **Diary** page.

### Step 3

You will now see the blood sugar readings of the patient, with associated meal times and notes.

### Step 4

You can also scroll to view different months. To do this click on the purple triangle buttons beside the month which is shown at the top of the diary.
