

# FPA-1500E-P-1072-150-SS-1M5

## FlexFrame PiezoActuator™

### Description

DSM's FPA is a flexure guided piezoelectric actuator useful for both dynamic and static applications. Custom mounting conditions can be integrated into the design. "E" version actuators expand when they are energized.

### Specifications

		Units	Tolerance
Motion Direction	Expanding		
Nominal Travel, 0V to 150V	1280	μm	Min 1088
Nominal Travel, -30V to 150V	1600	μm	Min 1360
Nominal Stiffness	0.25	N/μm	Min 0.21
Unloaded Resonant Frequency	185	Hz	±15%
Blocked Force*	320	N	
Capacitance	26.40	μF	±20%
Material	Stainless Steel		
Mass**	226	g	
Electrical Interface	Flying leads		
Mechanical Interface	Single M5x0.8 on center		
Height	28	mm	
Width	92	mm	
Depth	18	mm	

\* Blocked force calculated as [Stiffness x Travel Range at 0V to 150V]

\*\* Mass stated for reference

### Options

- Integrated Position Sensor
- Vacuum Compatibility
- Custom Mounting Holes
- Custom wire lengths and connectors
- Non-Magnetic compatibility
