

Case Study: Foster Delivery Science

Summary: Foster delivery Science of Putnam, Connecticut is a producer of biomedical polymers in the medical field. Foster has both a headquarter and production facility in Putnam, CT and another production facility in Las Vegas NV. The client was requesting a new virtual environment for their Foster Delivery location including new servers, SAN and switches.

Challenges: The client wanted to upgrade entire environment with minimal down time and interruption to business. Client also wanted all hardware to be preconfigured and tested before installed onsite.

Solution: WCA performed an IT assessment and then provided a proposal to perform the configuration of 2 new Dell host servers, 1 new Dell SAN, 1 Synology RackStation NAS and 2 new Extreme switches.

Benefits: The solution implemented at Foster Delivery Science provided a smooth installation with extremely little down time.

-
- The details of this install are as follows:
- Preconfigured and tested all hardware before installing onsite.
 - WCA tested the installed solution.
 - WCA completed a knowledge transfer to client with documentation.
 - WCA delivered completed project on time

Industry

Manufacturing
Pharmaceuticals
