

Case Study: City of Providence

Summary: The City of Providence migration to Hybrid Exchange Server & O365 in the capital city of Rhode Island.

Challenges: The client had an aging data infrastructure and experiencing rising costs.

Client requested a new solution for their aging Exchange Server and migration to O365. Client was also requesting minimal down time during project. For the purposes of this engagement WCA provided a detailed security review, Azure Server and Azure AD options.

Solution: WCA performed an IT assessment and then provided a complete program for the entire project. WCA then worked with existing OEM's per the clients request to design detailed timeline. Project also included configuration of 2 factor authentication and verification of mailbox migration with minimal downtime.

Industry

Municipality
Providence, RI

Environment

- Migrate to an O365 & Hybrid
- Exchange 2016 server with 2000+ mailboxes

Challenges

- Aging Data Center Infrastructure
- Migrate existing users/mailboxes/data to O365

Solution

- O365 & Hybrid Exchange Solution
