

Your Data gets deleted or corrupted, Active Directory is compromised...what do you do?

Option A:

- **Call WCA & talk to the on-call 24x7 team**
- **Get your credit card for Emergency Rates**
- **Cancel your upcoming personal plans to rebuild your data center**

Option B:

- **Call WCA & restore a copy of your AD from the cloud**
- **Restore your backup copy of data that was stored in the cloud**

Let's discuss *Option B* further for about the cost of a daily iced coffee. You already have the first two bullets below, let's add the data center recovery piece to it:

- **On-Premise Infrastructure / Active Directory**
- **Office365 / Gmail / One Drive / Sharepoint**
- **Cloud Active Directory / Backup as a Service**

Visio of Proposed Solution

How do we replicate & backup these solutions, just in case?

- IaaS Tenant at Green Cloud Technologies
- Site to Site VPN Tunnel
- 50Mbps Bandwidth
- Domain Controller in the Cloud
- Daily Backup / Snapshots of the Domain Controller
- 3TB of BaaS for “local data”

What's involved to build this insurance policy for your data center?

- ~\$300 / Month
- Typical 2 day remote deployment
- Professional Services can be billed over time
- Includes WCA Managed Support Services
- 120 Day Unconditional Guarantee
