

## Case Study: W. Muller Firewall Replacement

**Summary:** W. Muller company was founded in 1976 in Lohmer-Donrath Germany, is a leader in the Blow Molding industry. In 1997 they opened a western Massachusetts location in West Springfield and within 7 years moved to a larger 6500 square foot location in Agawam

**Challenges:** The client had increased their Internet Bandwidth and several negative network issues started to occur. WCA assessed the client's environment, it was determined that the current firewall was insufficient. WCA then provided a solution/quote with the client's preferred product/services and within their budget. Based upon the services requested WCA estimated a 2 day install.

**Solution:** The solution included the replacement of their existing firewall with a SonicWall TZ600. WCA preconfigured the new TZ600 SonicWall so the minimal disruption to the day to day business connectivity was less than 30 minutes during the cut over.

**Benefits:** The new SonicWall TZ600 Firewall solution has greatly enhanced W. Muller's data center. The details of this install are as follows:

- Configured/tested/installed a TZ600 SonicWall Firewall
- Purchased/Applied Wild Card Cert
- Modify all Cisco to SonicWall licensing
- Minimal interruption to daily schedule (less than 30 minutes)
- Designed solution implemented met the clients requested needs
- Transferred knowledge to IT staff

### Industry

Agawam, MA & Germany  
Manufacturing

### Environment
