|-----------------------------------|--|
| <b>General advice</b>             | IN CASE OF SERIOUS OR PERSISTENT CONDITIONS, CALL A DOCTOR OR EMERGENCY MEDICAL CARE.  |
| <b>Eye contact</b>                | Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Keep eye wide open while rinsing.   |
| <b>Skin contact</b>               | Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Wash contaminated clothing before reuse. Take victim immediately to hospital.  |
| <b>Inhalation</b>                 | Remove casualty to fresh air and keep at rest in a position comfortable for breathing. If not breathing, give artificial respiration.  |
| <b>Ingestion</b>                  | Clean mouth with water. Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Call a physician or poison control centre immediately.  |
| <b>Protection of first-aiders</b> | First aider needs to protect himself. See Section 8 for more detail. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. |

4.2. Most important symptoms and effects, both acute and delayed

|                     |   |
|---------------------|---|
| <b>Eye contact</b>  | Not classified based on available data. The supplier of some components contained within this formulation has indicated that the classification as irritant is not required.        |
| <b>Skin contact</b> | Not classified based on available data. High pressure injection of the products under the skin may have very serious consequences even though no symptom or injury may be apparent. |
| <b>Inhalation</b>   | Not classified based on available data.   |
| <b>Ingestion</b>    | Not classified based on available data. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhoea.  |

4.3. Indication of any immediate medical attention and special treatment needed
