Results of Real-World PRO Collection Via the CancerAid App
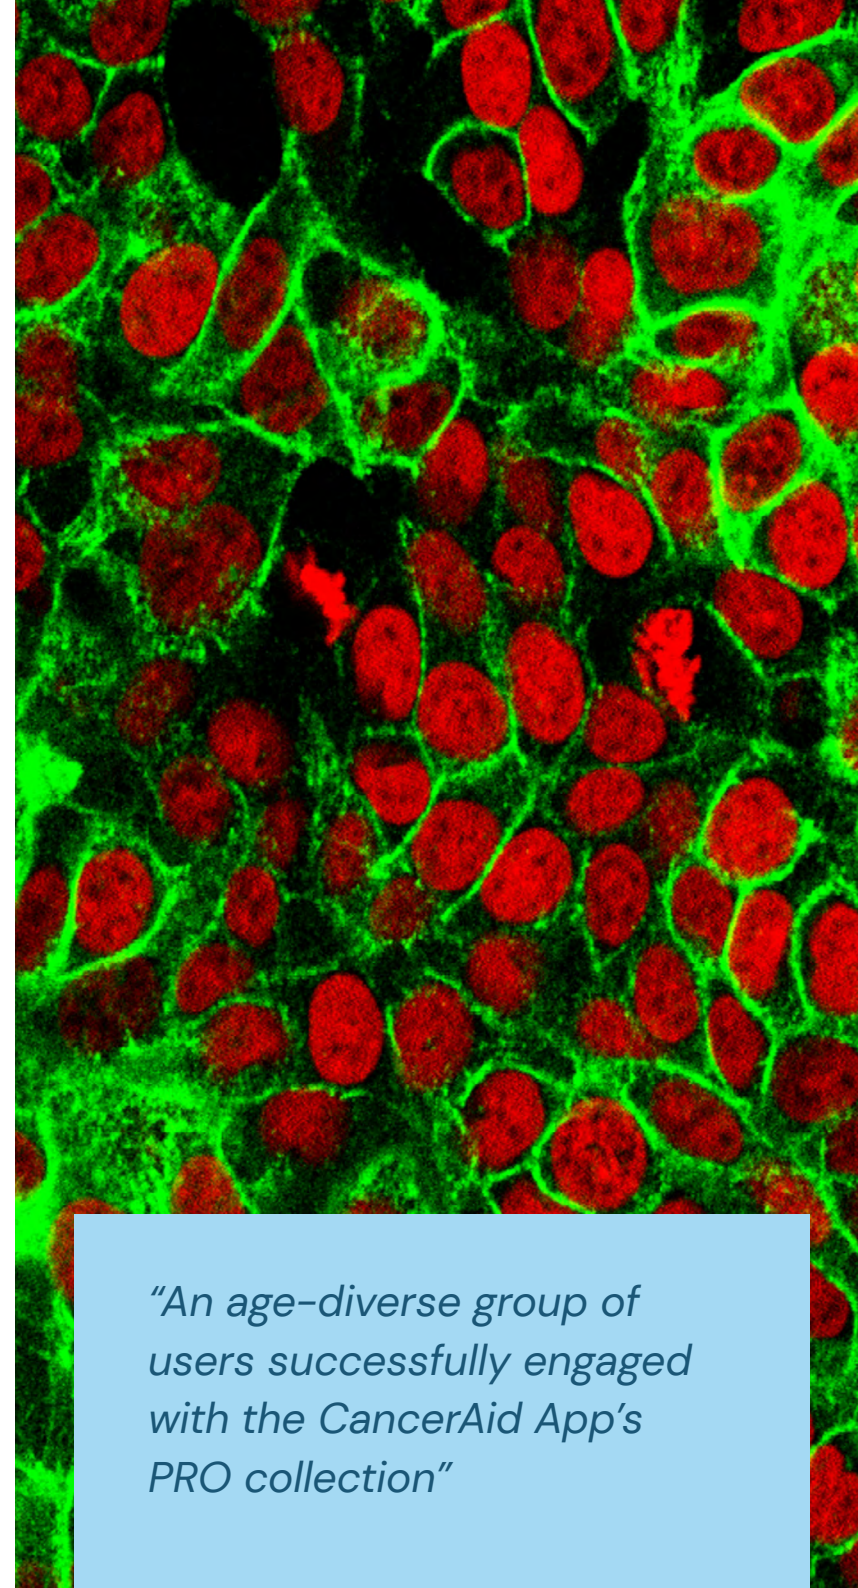

"An age-diverse group of users successfully engaged with the CancerAid App's PRO collection"

Study Summary

This retrospective study analysed 510 unique users logging symptoms in the CancerAid App between June and December 2018. The CancerAid App is a mobile application developed by CancerAid with over 20,000 users across 54 countries. Users can track up to 18 different symptoms based on the combined Symptom Tracking and Reporting, and Edmonton Symptom Assessment Scale frameworks.

Key Outcomes

Top 3 symptoms: pain, fatigue, other

Patients ≥70 were the highest group to manually record symptoms
