Cisco Prime and Cynerio – Continuous Asset Discovery and Healthcare IoT Visibility

Locate Devices at Your Hospital When You Need Them

Healthcare facilities need to manage a consistently expanding fleet of tens of thousands of connected devices. Manually taking their inventory and profiling them isn't possible at such scale, especially when traditional IT solutions can't recognize or protect most medical or IoT devices.

Cynerio provides continuous end-to-end asset discovery with full visibility into every connected device (including IoMT, IoT and OT systems) across the clinical ecosystem, even those hidden behind firewalls, terminal servers, and connectivity engines. Cynerio automatically maps communication patterns and profiles each device's characteristics to enable effective and proactive asset management for diverse healthcare ecosystems of all sizes and structures.

One of the major difficulties in maintaining an accurate asset inventory for a healthcare facility is the fact that many of the portable devices are constantly moved from place to place and connected to different access points throughout the facility. Integrating Cynerio with your network’s wireless LAN controller enables Cynerio to deliver enhanced visibility into access point connectivity, making it easier to physically locate each device on your network.

Solution Components

- Cynerio Healthcare IoT Security platform
- Cisco Prime network management software suite

Integration Benefits

- Locate all your healthcare IoT devices wherever and whenever you need them
- Quickly identify, pinpoint, and patch risky devices before they can be attacked or affect patient care
- Ensure frequent and efficient use of the medical devices your facility has invested in
- Integrate detailed access point and LAN data into the Cynerio's asset management and device risk intelligence
- Seamless integration can be enabled from within the Cynerio portal in minutes

The Cisco Prime portfolio of IT and service provider management offerings empowers IT organizations to more effectively manage their networks and the services they deliver. Built on a service-centered foundation, Cisco Prime supports integrated lifecycle management through an intuitive workflow-oriented user experience - providing A-to-Z management for EPNs, mobility, video, cloud, and managed services.

About Cynerio

Cynerio is the one-stop-shop Healthcare IoT security platform. With solutions that cater to healthcare's every IoT need—from Enterprise IoT to OT and IoMT—we promote cross-organizational alignment and provide hospitals the control, foresight, and adaptability they require to stay cyber-secure in a constantly evolving threatscape. We empower healthcare organizations to stay compliant and proactively manage every connection on their own terms with real-time IoT attack detection & response and rapid risk reduction tools, so that they can focus on a hospital's top priority: delivering quality patient care.
