

Ahmed Aly

22. June 2020

LOYALTY

Ahmed has worked remotely for the last 6 years as a freelance and contracted employee. He has been with his latest employer for more than 3 years.

REMOTE FIT

Ahmed lives in Cairo, Egypt, and has a strong internet connection at his professional home office. He is fluent in English and a great communicator.

FLEXIBILITY

He is a professional software engineer and has for most of his career held positions like this. He has a bachelor's degree in mechanical engineering, so he is capable of working with complex projects. He has also worked full time as a mobile developer.

GROWTH MINDSET

Ahmed obtained 2 certificates in 2019 to broaden his knowledge of software engineering. He is constantly trying to improve himself and works on many projects in his own time to train himself to be better and understand complex problems in a hands-on fashion.

CV/ONLINE PROFILES

His CV is short, and misses some parts about his experience. His CV is better and contains more examples of what he has worked on. He has a structured brain as an engineer and does not spend too much time on the visuals on his profiles.

VOLUNTEERING

Ahmed has not indicated any volunteer work.

OUR FEEDBACK

Ahmed is a software engineer that wants to work on meaningful projects. He has extensive experience from e-commerce and food delivery apps and systems.

He has skills and experience in all elements of development, like UX, front-end development, back-end development and more.

Ahmed would fit into an established team as he comes across as a good team player.
