

Flex your meetings

TeamTablet™ Flex

TeamTablet™ Flex redefines the boundaries of collaboration by seamlessly integrating meetings, presentations, and whiteboarding into one powerful solution. TeamTablet™ Flex not only introduces cutting-edge features but also provides a pathway to unlock more possibilities for existing installations. Seamlessly convert your touch monitor into a TeamTablet™ in just 5 minutes, safeguarding your existing investment while expanding opportunities for advanced users. Whether utilizing a single display or a companion display, TeamTablet™ Flex eliminates the hassle of switching sources, enabling a truly seamless and collaborative environment.

Features

Meetings

Use with existing Teams Rooms, Zoom Rooms, Meet, Webex or any other video conference. Control your meeting directly from the touch display.

Use with any meeting room appliance, new or existing to protect your investment.

Install as a single display with a video bar or as a companion interactive display to an existing video room.

Compatible with Poly Studio series (X70, X50, X30, Studio)

Compatible with Logitech Rally series (Rally Bar Mini, Rally Bar, Rally Plus)

HDMI Input up to 4K UHD (3840*2160)

Presentation & Third-Party Applications

Proprietary wireless interactive screensharing solution

Best-in-class touch latency with pre-inking¹

Resolutions up to 4K60Hz through Miracast and Airplay

Touchback with up to 40 simultaneous touches Pen/finger differentiation with tool support

Third party application support with touchback (includes whiteboarding apps like Miro, Mural or others)

Whiteboarding

Best-in-class touch performance with zero-latency inking

Ad-hoc whiteboarding or remote collaboration in real-time with your colleagues from TeamTablet™ and/or personal devices

Load and save boards on your personal cloud connected account

Seamless integration with Microsoft Teams

Secure, tenant-based cloud and device administration²

Identity management system integration (Azure AD SSO)²

Administration and management

Device management

Setup your device through an easy onboarding process within minutes of unboxing

Manage your device configuration both on the device and through the web

Automatic software updates including regular security updates

Administration

Administration of user accounts, device settings and permissions of all devices in your tenant through the cloud administration platform²

Automatic or manually administered device updates for all devices within your tenant through our cloud administration platform.²

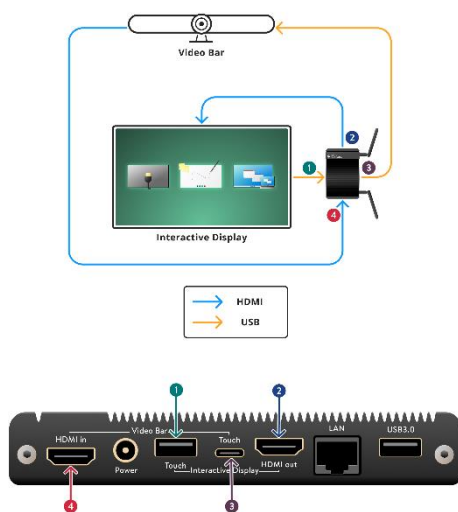

Leverage SAML-based SSO (single sign-on) to seamlessly integrate TeamTablet™ Flex into your existing identity management systems (eg. Azure AD)²

Configurations

Single display setup

Add the TeamTablet™ Flex to your existing IFPD and meeting solution.

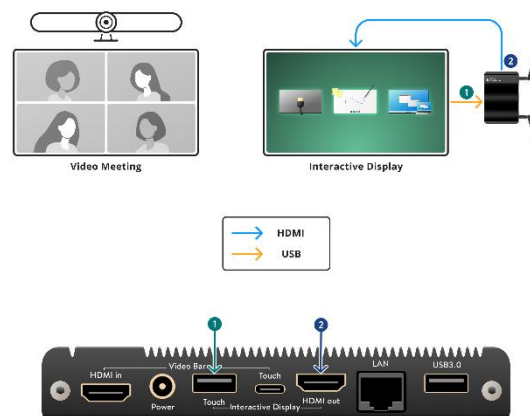

No additional accessories needed, everything you need is included in the box.

Companion setup

Add the TeamTablet™ Flex with your existing IFPD and meeting solution with front-row display and control display.

No additional accessories needed, everything you need is included in the box.

¹ For best possible experience use together with an InGlass display

² Available with an Enterprise subscription
