Subject: Request to stop dredging in river Sal.

Sir,

This is to request you to stop the ongoing dredging in the river Sal to the immediate effect.

As you are well aware that fishing community a depending on the river for their livelihood.

1. The livelihood security is not considered, the channel created by the dredger is destroying their ^{Fish} breeding grounds.

2. The excavated toxic silt is deposited on the banks destroying the mangroves by smothering their roots, causing destruction to the surrounding biodiversity and loss of habitat.

3. As per CRZ law silt, ^(Dredge Material) should not be dumped under village jurisdiction. 4. Repeated request were made to stop the sewage treatment plant at Khareaband discharging the waste but it is still discharging, contaminating the river.
