

Water Bowser with Pump

For sites that do not benefit from a mains water supply, we can deliver and install water bowzers with electric, on-demand water pumps.

Our pumps deliver water to toilet blocks or office buildings and create pressure that is comparable to a mains supply and feature on demand pressure switches so will only activate when required.

One pump is capable of running many toilets and taps, but if you are unsure of how many you need please speak to one of our hire team.

Features

- On demand water for all your site needs.
- Robust 1000 Litre storage containers.
- Fully linkable to create larger capacities
- Regular water filling can be arranged
- Simple cut off function prevents dry run damage
- Protective container- optional extra

On Demand Pump

Protective Case

D-tox can deliver as many water containers as you require for your sites needs. They can be linked if needed to create much larger capacities.

We can also deliver non-potable water to your site once you have water bowzers in place, ensuring you have a regular water supply.

If you require further information or would like to place an order, please contact our hire team.
