

At every public event there is a legal requirement to supply welfare facilities for wheelchair users and other non-able bodied persons. This is governed by the Disability Discrimination Act 1995.

With this in mind, we have a large stock of suitable toilet units which we can supply to your site.

All of these units enable access for both a wheelchair user and another person if needed, and feature a recirculating flush chemical toilet. These units also feature handwashing or sanitising facilities and are supplied with all necessary consumables at initial setup.

We can also supply a baby changing station in the unit to help any parents with babies/toddlers who may be attending your event.

Radar locks can be provided to help prevent access to the units by members of the public who could otherwise use standard portable toilets.

Features

- Designed for wheelchair access - for construction, commercial and event use
- Recirculating flush toilet, ideal for when no mains water or waste drainage is available
- Hand washing facilities
- Baby change facilities can be added as an option.
- Ventilation system to promote odourless conditions even in hot weather
