

Single User Urinal for limited access areas

A wheeled, compact mobile urinal that is easy to move and quick to set up anywhere you want.

In spots where it's difficult to have a portable toilet, this mobile urinal is a great alternative.

Use this urinal on high-rise construction sites, at care homes for emergency use or wherever you have a need.

Specifications

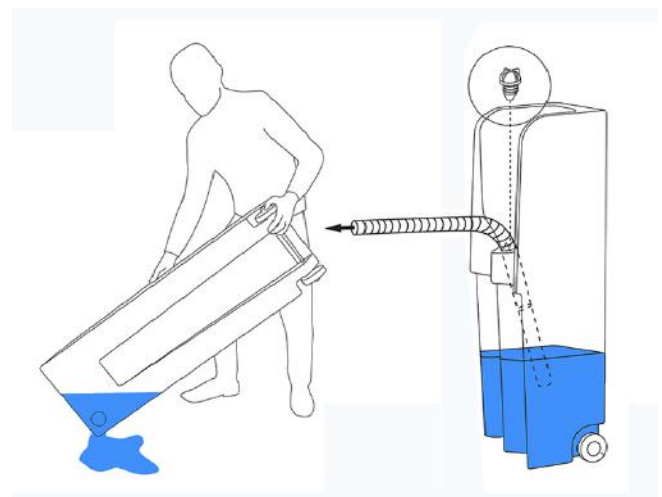

Height	1200mm
Width	390mm
Depth	330mm
Dry Weight	10kgs
Capacity	50ltrs

This product is ideal for use on sites where workers are unable to access a standard toilet or even a portable toilet due to access issues.

These units can be transported down narrow corridors, up/down stairwells and even be moved in a lift if needed.

Having these units on site can help prevent the unwanted but often inevitable problem of workers and or visitors urinating against walls or in areas where it becomes a problem.

They have a large waste capacity and can easily be emptied down sewage channels at site but we will also attend site weekly and empty them for you with one of our vacuum tankers.
