

# Septic Tank Emptying

If your home or business is not connected to the mains sewerage system then chances are you will have a septic tank that requires regular emptying.

If these tanks are not emptied regularly it can lead to several problems including slow running sinks and toilets in your home or premises.

With a fleet of specialist tankers D-tox can help you keep your septic tank in working order by providing regular, reliable, cost efficient empties.

## Why D-tox ?

- With a fleet of tankers of various sizes, we can manage access to sites in rural or hard to reach areas.
- You don't even need to be at home when we come, as long as we have access we can send you an electronic proof of emptying including photos with time stamps.
- Once we've emptied your septic tank, cesspit or sewage treatment plant, we transport the waste to a licensed treatment facility.
- We're fully licensed by the Environment Agency so you can be assured you are dealing with a reputable company.
- If you're unsure as to whether we will gain access we can arrange a site visit to assess the site and give you advice.

If you require further information or would like to place an order, please contact our hire team.
