University of Rochester

Margaret "Molly" Hayes, MD, ATSF
Assistant Professor of Medicine
Director, Medical Intensive Care Unit
Founder and Co-Director, Center for Humanizing the ICU
Beth Israel Deaconess Medical Center
Harvard Medical School

New York State Thoracic Society

The New York State Thoracic Society (NYSTS) is a State Chapter of the American Thoracic Society. Formerly called the New York State Trudeau Society, NYSTS is named after Edward Livingston Trudeau (1845-1915) for whom a lectureship at this annual meeting is named.

The first American Investigator to culture the tubercle bacillus, the causative agent for tuberculosis, he founded Adirondack Cottage Sanitarium at Saranac Lake, NY in 1884 based on his own open air cure of tuberculosis.

Purposes of Our Society

- To be a society, committed to the highest professional and scientific standards, and dedicated to the collection, interpretation, and dissemination of scientific information concerning all aspects of respiratory disease.
- To participate actively with medical societies and with other official and non-official organizations in this state.
- To improve the teaching of respiratory disease in medical schools. To encourage and support professional and technical education and all aspects of research in the field of respiratory disease.

The Society is overseen by an Executive Committee comprised of its officers and committee members, all of whom conduct ongoing Society business during the year.
