

New York State Thoracic Society and Upstate Medical
University's Anatomy Department
presents
2024 PCCM/CCM Fellow Advanced Procedures Course

Discover new insights for performing bronchoscopy, percutaneous tracheostomy, and pleural procedures that you can quickly implement at your patients' bedsides. This course will help you build expertise on how to manage critically ill patients with these procedures. Using cadaveric models, you'll develop your proficiency with bronchoscopy-guided percutaneous tracheostomy and cricothyrotomy, chest tube placement both surgical and pigtail.

Course Director: Ioana Amzuta, MD, FCCP, Associate Professor of Medicine

Course Co-Director: Dana Mihaila MD, Ph-D, Associate Professor of Medicine

Faculty:

Manju Paul, MD, FCCP, Associate Professor of Medicine
