

The neXtgen sheep producer

We have designed our service offering so that you can adjust it to your needs and so that it works in with other services you utilise across your business.

The Hub, emails, audio and video

As a neXtgen Agri client you will have access to The Hub which includes our internal podcasts. You will also receive our fortnightly newsletter and access to any events we run online or in-person.

Included

Here to help

However you prefer to communicate, part of signing on to a neXtgen Agri package is the ability to regularly discuss your options and to seek advice from the team.

Included

Breeding plan and ram team management

We bring structure to breeding programs to make sure the aims of the business align with actions on the ground. We then make sure you have the best ram team possible, within your budget.

Standard option

Replacement ewe classing

We provide an external eye to help determine which ewes are retained for breeding. Our consultants are trained in providing this service with your breeding plan in mind and adjust the process to meet the needs of your sheep breed and type.

Recommended option

Flock data management & EID

We provide support through the data collection process to ensure you're collecting information that will practically provide the best value within your system. Depending on your needs, we can draft files, analyze and interpret data and provide reports. You collect the data, and we manage it.

Opt-in option

EweSort indexing of ewes

This system is unique to neXtgen Agri and allows you to utilise the data you have collected on young ewes to accurately rank your ewes based on your own priority of traits. It is a solution tailored exactly to your property and sheep type.

Opt-in option

Optimising adult ewe reproduction

Managing ewes to improve their reproductive performance is one of the quickest way you can improve the profitability of a sheep production system. Success is focussed on condition score management and we help you make good decisions throughout the breeding cycle.

Recommended option

Maximising first lambings

Whether your ewes have their first lamb at 12 or 24 months of age, there tends to be a lot of opportunity to improve their performance. There are a series of decisions that need to be made each year and we guide you through these important points.

Opt-in option

The cost of each service varies with the scale of your business. You can select the services you want however, there is a minimum package cost for each property type. The prices listed are for an annual service and do not include GST which will be added to the final price. The prices also do not include the cost of travel and other costs incurred on your behalf (eg. purchase of Tissue Sampling Units), these direct costs will be charged in addition to the prices stated.
