

## Factsheet

### Date

29 - 30 September 2022

### Location

AXICA Kongress- und Tagungszentrum  
Pariser Platz 3, 10117 Berlin

### New Food Conference

Disruptive protein technology and the market for sustainable food solutions are both growing at a mind-blowing pace. The New Food Conference is a unique, industry-oriented event that aims to accelerate and empower these innovative food technologies by bringing together key stakeholders. It is Europe's first and biggest conference on new-protein solutions.

### Focus of the event

Plant-based meets cellular agriculture: two complementary approaches towards a more resilient food system.

We are on the cusp of one of the fastest and most consequential transformations of the food system since humans first started domesticating plants and animals. Sales of plant-based products are skyrocketing, while cellular agriculture and precision fermentation hold the potential to change the way we grow our food forever.

### Audience

The New Food Conference Berlin invites international food professionals, scientists, and politicians to gain an understanding of how far these developments have progressed, and where they will take us in the future. In addition to sharing valuable expertise, the event places a strong emphasis on encouraging networking and enabling personal interactions between food-industry stakeholders.
