

## O WOW! Moment— Note Card Annoyer

Can you demonstrate how sound vibrates using a note card?

### MATERIALS

- ❖ Note Card(s)
- ❖ Scissors

### GET SET UP

1. Grab a note card and fold it in half. Any size note card will do.
2. Cut two small triangles along the fold. Make sure the triangles are at least an inch away from the edges of the note card.
3. Fold down the top, open edge to the crease.
4. Flip the card around and fold that edge to the crease.
5. Hold your card tightly between two fingers so that the crease is vertical and the triangles are facing out.
6. Place the card between your lips and blow hard! What happens?
7. Play around with how tight and loose you hold the note card between your fingers. What do you notice?
8. Now try to find the perfect grip of the note card to make the best, most annoying sound!
