

MITOCHONDRIA
Provides energy to the cell. Kind of like how a power plant provides energy to a house.

VACUOLE
Gets rid of waste.

NUCLEUS
Brain of the cell.

CHLOROPLAST
Turns light from the sun into energy for the plant. The structure of the plant that grabs the most sunlight are the leaves.

CELL MEMBRANE
Allows good stuff into the cell.
Gets rid of bad stuff from the cell.

CELL WALL
Provides structure and protection for the cell.

CYTOPLASM
Holds everything in the cell together.
