

CoreSite and Microsoft Cloud

FAST, RELIABLE, PRIVATE CONNECTIVITY INTO MICROSOFT AZURE

EXPAND YOUR INFRASTRUCTURE WITH CORESITE AND AZURE EXPRESSROUTE

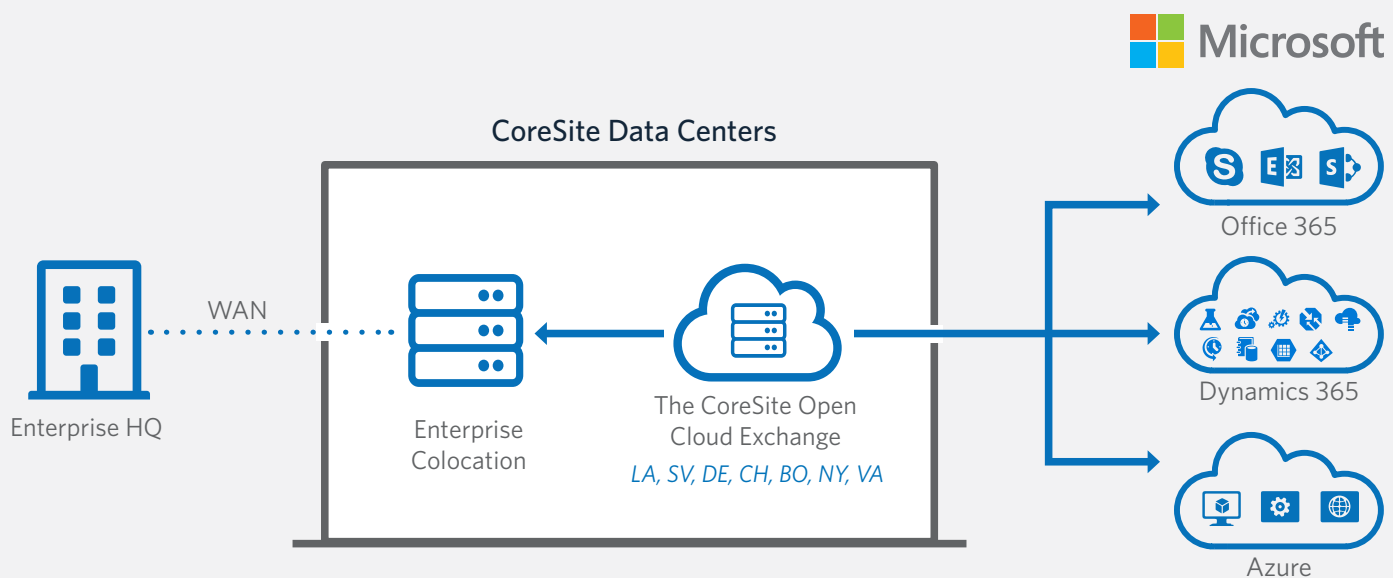

Microsoft Azure ExpressRoute provides a secure, private connection between your IT deployment, Microsoft Azure, Office 365 and Dynamics 365. ExpressRoute connections bypass the public Internet offering more reliability, faster speeds, lower latencies and higher security than typical Internet connections. With predictable, reliable and high-throughput connections offered by ExpressRoute, you can build hybrid cloud applications without compromising security or performance.

HOW IT WORKS

With Microsoft Azure ExpressRoute, you can establish direct connections to Microsoft Cloud at CoreSite's ExpressRoute locations in Los Angeles, Silicon Valley, Denver, Chicago, Boston, New York and Northern Virginia. ExpressRoute connections are available via the CoreSite Open Cloud Exchange™ in connection speeds of 50 Mbps, 100 Mbps, 200 Mbps, 500 Mbps, 1 Gbps, 2 Gbps, 5 Gbps, 10 Gbps, and 100 Gbps.

The integration of Microsoft Azure ExpressRoute and the CoreSite Open Cloud Exchange provides greater performance, better reliability, and access to a best in class, end-to-end, fully redundant connection architecture backed by an industry leading availability SLA.

THE CORESITE OPEN CLOUD EXCHANGE

One Connection. Countless Opportunities.

The CoreSite Open Cloud Exchange provides a single port into our layer 2 Ethernet switching product, enabling private virtual connections to a robust ecosystem of network, cloud and IT service providers. The online portal allows on-demand access for CoreSite customers to interface directly to virtual cloud environments. Through individualized portals, customers maintain control of data in real time, providing the scalability and elasticity essential for cloud applications.

Accelerate Your **Digital Business**

CoreSite’s secure, reliable data centers located in edge markets across the US, provide the ideal environment for connecting into Microsoft Azure and building your hybrid multi-cloud solutions. CoreSite is one of the only colocation providers in the US to offer direct access to Microsoft Azure ExpressRoute while offering the security of built-in network resiliency and SLAs. When you colocate within CoreSite’s data centers you will benefit from seamless connectivity between your public and private IT infrastructure — supporting your digital business now and into the future.

BENEFITS TO YOU

INCREASED SECURITY

Private, secure connectivity to nearly all Microsoft services

44% REDUCED LATENCY

Geographic proximity to Microsoft Azure compute nodes in region offers fewer network hops

60% REDUCED COSTS

All data transferred over ExpressRoute private connections benefit from reduced data egress rates

60% REDUCED VARIABILITY

Connecting at the edge of the Microsoft Azure network backbone offers predictable network performance
