

Synergem Technologies Employs CoreSite's Los Angeles Data Center Campus to Expand the Reach of Its Emergency Services Solutions

June 27, 2017

DENVER--(BUSINESS WIRE)--Jun. 27, 2017-- CoreSite Realty Corporation (NYSE: COR), a premier provider of secure, reliable, high-performance [data center](#) and [interconnection](#) solutions across the U.S., today announced that Synergem Technologies, Inc., a leading provider of Next Generation 9-1-1 solutions, is expanding its presence in California with CoreSite as its data center solution partner, deployed within CoreSite's [Los Angeles](#) data center campus.

This Smart News Release features multimedia. View the full release here: <http://www.businesswire.com/news/home/20170627005175/en/>

Synergem Technologies uses CoreSite's Los Angeles campus due to its leading network-dense position in that market, providing the company access to more than 240 carriers on the West Coast, as well as to leverage proximity to one of its existing partners that is also deployed within CoreSite's Los Angeles campus. The company's SynergemNET™ suite of hosted services provide a fast, flexible and cost-effective way for carriers, state and local governments, and even individual Public Safety Answering Points (PSAPs) to migrate from legacy 9-1-1 technology into the latest NENA i3 standards.

Synergem Technologies' deployment at CoreSite's Los Angeles campus is a principal site for managing all of its activities as part of a dual data center, fully redundant model for public safety communications, requiring reliable high-performance and low-latency connectivity to facilitate connections from any carrier on the West Coast that has to originate 9-1-1 calls, which are then routed to their appropriate PSAP.

"With customers from coast to coast, it's important to Synergem that our data centers provide the high quality and reliability that public safety demands. In addition, we need to interconnect with all the major carriers that originate 9-1-1 traffic throughout the country," said Jeff Schlueter, Chief Operating Officer at Synergem. "CoreSite's location and existing carrier agreements are a vital component of our SynergemNET™ service nationwide."

The CoreSite Los Angeles campus includes two data center facilities—[LA1](#), also known as One Wilshire®, one of the most interconnected buildings in the world, and [LA2](#) with over 424,000 square feet of scalable space in downtown Los Angeles. CoreSite's Los Angeles campus community features more than 500 network, cloud and enterprise customers, as well as access to the largest peering exchange on the West Coast—[CoreSite's Any2Exchange® for Internet peering](#). This combination of scalable space and opportunities for interconnection makes CoreSite's Los Angeles campus a premier option for businesses looking to support mission-critical IT applications.

"We are pleased that Synergem Technologies chose to deploy in our Los Angeles campus, leveraging our carrier neutral, network-dense colocation environment," said Steve Smith, Senior Vice President of Sales and Marketing at CoreSite. "We look forward to providing Synergem Technologies with a high-performance data center solution to support next generation technology-based applications that serve critical public safety requirements."

About Synergem Technologies

Synergem Technologies is the leading provider of NENA i3-based solutions for public safety. The SynergemNET™ suite of hosted services provides a flexible and cost-effective way for telecom carriers, state and local governments and even individual PSAPs to migrate quickly from the legacy environment to a true NG9-1-1 platform. Forward Looking Statements

This press release may contain forward-looking statements within the meaning of the federal securities laws. Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "pro forma," "estimates" or "anticipates" or the negative of these words and phrases or similar words or phrases that are predictions of or indicate future events or trends and that do not relate solely to historical matters. Forward-looking statements involve known and unknown risks, uncertainties, assumptions and contingencies, many of which are beyond CoreSite's control that may cause actual results to differ significantly from those expressed in any forward-looking statement. These risks include, without limitation: any adverse developments in local economic conditions or the demand for data center space in these markets; operational difficulties, including difficulties relating to information systems, internal processes and information security; significant industry competition; financial market fluctuations; and other factors affecting the real estate industry generally. All forward-looking statements reflect CoreSite's good faith beliefs, assumptions and expectations, but they are not guarantees of future performance. Furthermore, CoreSite disclaims any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions or factors, of new information, data or methods, future events or other changes. For a further discussion of these and other factors that could cause CoreSite's future results to differ materially from any forward-looking statements, see the section entitled "Risk Factors" in CoreSite's most recent annual report on Form 10-K, and other risks described in documents subsequently filed by CoreSite from time to time with the Securities and Exchange Commission.
