

## CoreSite Announces Relationship with AMS-IX, Making CoreSite the First AMS-IX Enabled Data Center Operator in North America

August 2, 2012

Access to Amsterdam Internet Exchange (AMS-IX) Ports Directly Available Through CoreSite Data Centers

DENVER--(BUSINESS WIRE)--Aug. 2, 2012-- CoreSite Realty Corporation (NYSE: COR), a national provider of powerful, network-rich data centers, today announced a newly established relationship with Amsterdam Internet Exchange (AMS-IX), which will result in direct access to the AMS-IX peering exchange from multiple CoreSite locations across the U.S. The AMS-IX relationship forms part of CoreSite's Open Internet Exchange Hub, the purpose of which is to aggregate the interconnection capabilities of the world's leading internet exchanges. This aggregation provides CoreSite customers with expanded peering opportunities through a simple connection to leading internet exchanges throughout the world.

Internet exchanges allow organizations to directly connect their internet infrastructure through a stable, fast, and cost-effective fabric for ecosystems such as network, digital content, and cloud. AMS-IX, one of the world's largest internet exchanges, currently connects over 500 networks, 375 router-server peers with open-peering policies, and nearly 1,000 customer ports.

Through the addition of AMS-IX to CoreSite's Open Internet Exchange Hub, a CoreSite customer now can extend its network connectivity with a single contract from multiple facilities throughout the U.S., including Los Angeles; Chicago; New York; Denver; Washington, DC; Northern Virginia; and the San Francisco Bay Area.

"We are focused on bringing solutions to our customers that increase interconnection options through an open-exchange platform," stated Eric Bell, General Manager, Network and Interconnection, at CoreSite. "The AMS-IX enabled program provides CoreSite's Open Internet Exchange customers simplified access to one of Europe's leading internet exchanges. It brings best-of-breed providers together to deliver dense interconnection ecosystems and diversity in the U.S. market."

Job Witteman, Chief Executive Officer at AMS-IX, added, "AMS-IX is looking forward to expanding interconnection options to locations outside of Europe. We see CoreSite as an important resource, helping us to realize our vision to reach networks within the U.S. The network density seen at CoreSite's One Wilshire campus and other facilities provides the optimal platform to achieve that goal."

### About Amsterdam Internet Exchange (AMS-IX)

AMS-IX, Amsterdam Internet Exchange, is a neutral and independent internet exchange based in Amsterdam-The Netherlands since the early 1990's. AMS-IX has more than 500 interconnected IP networks and a traffic peak of over 1.6 terabit per second, making it one of the largest internet exchanges in the world. The AMS-IX platform provides a professional, high quality, non-blocking peering service for all types of IP traffic, including regular IP data such as e-mail or web content, video/TV, and voice. Networks connected at this platform can have an optional Service Level Agreement (SLA) to offer quality guarantees and Performance Indicators. AMS-IX additionally hosts the first mobile peering point worldwide, the Global GPRS Roaming Exchange (GRX) and the Mobile Data Exchange (MDX) and the first interconnection of IPX networks (Inter-IPX).

### Forward Looking Statements

*This earnings release and accompanying supplemental information may contain forward-looking statements within the meaning of the federal securities laws. Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "pro forma," "estimates" or "anticipates" or the negative of these words and phrases or similar words or phrases that are predictions of or indicate future events or trends and that do not relate solely to historical matters. Forward-looking statements involve known and unknown risks, uncertainties, assumptions and contingencies, many of which are beyond CoreSite's control, that may cause actual results to differ significantly from those expressed in any forward-looking statement. These risks include, without limitation: the geographic concentration of CoreSite's data centers in certain markets and any adverse developments in local economic conditions or the demand for data center space in these markets; fluctuations in interest rates and increased operating costs; difficulties in identifying properties to acquire and completing acquisitions; significant industry competition; CoreSite's failure to obtain*

*necessary outside financing; CoreSite's failure to qualify or maintain our status as a REIT; financial market fluctuations; changes in real estate and zoning laws and increases in real property tax rates; and other factors affecting the real estate industry generally. All forward-looking statements reflect CoreSite's good faith beliefs, assumptions and expectations, but they are not guarantees of future performance. Furthermore, CoreSite disclaims any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions or factors, of new information, data or methods, future events or other changes. For a further discussion of these and other factors that could cause CoreSite's future results to differ materially from any forward-looking statements, see the section entitled "Risk Factors" in CoreSite's most recent annual report on Form 10-K, and other risks described in documents subsequently filed by CoreSite from time to time with the Securities and Exchange Commission.*
