A futuristic city street scene at night. A white car is in the foreground, emitting concentric blue circles representing sensor waves. In the background, there are other cars, pedestrians, and buildings. A large, stylized orange 'X' is superimposed over the center of the image, crossing out the text.

WHAT'S THE FUTURE OF TRANSPORTATION?

CASE STUDY: PARKSIDE PLACE

'Pop-up City' planned for Seminole County

The mixed-use project includes 1,682,876 ft² in four phases: office/commercial, 250-room hotel, 312-bed assisted living facility, 5,012 apartment units (752 units for student housing and 184 units for independent living).

Eliminated 9000 parking spaces

5-0 vote for approval

CASE STUDY: PARKSIDE PLACE

SMART PARKING ORGANISATION TECHNOLOGIES

SPOT - Smart Parking Organization Technologies

SPOT is a technology platform that uses data transmission via IoT networks to solve parking difficulties. It consists of #Detector (smart parking vehicle detector) that reliably tracks parking occupancy in particular slots, #Permit card that validates parking through a cloud-based server smart parking application #DaTA and #Locker (intelligent mechanical barrier) controlled via an app (in development). Combining these elements enables solutions to any parking use-case - which is our mission!

Incubated
in 2018

Technology 3 Ways

Mobility Technology

(space-light options, MaaS)

Parking Technology

(monitoring to meet permits, ability to rent excess space)

Partnerships

(developer as new mobility catalyst)

CASE STUDY: PARKSIDE PLACE

NOW

TECHNOLOGY

Payment apps
Navigation, sensors & apps
Smart parking meters
Carshare

PARKING

Designated carshare parking
Guide drivers to spots
Payment-by-app

PLANNING

TDM
Valets
Dynamic pricing
Parklets, Streateries, Corrals

TRENDING

TECHNOLOGY

Autonomous Parking
Shared Use Mobility
Microtransit
Electric charging

PARKING

Pickup/Drop off zones
(passengers & deliveries)
Smart garages

PLANNING

Queuing
On-street space reallocation
Parking districts
Flexible garage design
Ubiquitous charging stations

EMERGING

TECHNOLOGY

Autonomous Shuttles
(1st- fixed route,
then demand-response)
Mobility-as-a- Service (MaaS)

PARKING

Off-site parking
Shared, automated, district
parking

PLANNING

Shuttle route planning
Transition (driver/driverless)
Coordination with transit
Repurposed garage spaces

FUTURE?

TECHNOLOGY

Individual cars - % of fleet?
Owned or shared? Publicly or
privately operated?

PARKING

What are the best parking
locations to balance demand-
response with lower congestion
& VMT?

PLANNING

How should parking be priced?
How should cities retool parking
revenue?

WHAT'S TRENDING: GARAGE TECH

FLEXPARK * DESIGN

- Convert grade level to commercial space
- Vehicle pick up and drop off
- Shared vehicle staging, charging and service
- Convert parking to warehousing, office, residential or other uses
- Green roof conversion
- Partial demo for other use

**Flexpark is TM*

FLEXPARK DESIGN

Kerkstra Precast Co

FLEXPARK DESIGN

Kerkstra Precast Co

FLEXPARK DESIGN

Kerkstra Precast Co

WHAT'S NEXT: GARAGE LAYOUT

Conventional car-parks

Autonomous vehicle car-parks

AV car-parks can decrease the need for parking space by an average of 62% and a maximum of 87%.

Mehdi Nourinejada, Sina Bahramib, Matthew J.Roordab

WHAT'S NEXT: GRAB & GO MOBILITY

WHAT'S NEXT: ZERO* PARKING FOR TOD

REAL TIME, RIGHT-SIZE PARKING CALCULATOR

RESEARCH

Strategic “bundles” of Tech + TDM?

Plan & code audits + re-write?

**Simulations & predictive analytics?
(Circulation – Looking at you!)**

Redundancy (Cyber? Outages?)

**Your idea here cause it's time
for Q&A !!**
