WHY TALK ABOUT AUTONOMOUS VEHICLES NOW?
AV INITIATIVE FRAMEWORK

IDENTIFYING COMMUNITY NEEDS

PUBLIC ENGAGEMENT
Public sector agencies should engage community members in ways that prioritize the voices of underserved groups.

EQUITY ISSUES
During engagement, public sector agencies should focus on equity-related issues such as affordability and ADA accessibility to understand the community members' transportation needs and explore if AVs can help to fill mobility gaps.

SHAPING DEPLOYMENT

MODELS OF GOVERNANCE
Policy approaches to AV deployment — from laissez faire to interventionist — are shaped by federal, state, and local regulations, investments, and programs and will look different on a state-by-state basis.

TOOLS AND LEVERS
There are a variety of resources and activities that local governments can leverage when working with AV service providers that can incentivize those providers to address equity issues and help achieve community goals.
