

Logistics Technology Practice

Experts at delivering highly skilled Warehouse Management System consultants globally

Our Logistics Technology team is a specialist practice within the Harvey Nash Group, a £1bn Technology recruitment, IT outsourcing and Leadership services business.

We are experts at delivering highly skilled Warehouse Management System consultants globally into Retail, Pharma, 3PL's, Energy, Food and Beverage organisations, on a contract, permanent or statement of work basis.

Our deep knowledge of the sector, as well as our technical expertise in areas like software, automation, robotics and AI mean we are able to partner with clients, helping them build scale, reduce costs and improve efficiency in their operations.
