RHYTHM ANALYTICS™

PROVIDING INSIGHT—With the help of your Rhythm control system, understanding your crop data can help drive down operational costs, and increase profit & yield. Identify performance trends and associated costs to take your business from a reactive state to a proactive one.

- **Data analytics are included** in every remote access package. No extra programs to download required.

- **Includes harvest overview** which details your number of harvests, yield totals (in lbs.), and a trend of your cost per pound vs. sale price.

- **Your personalized feed overview** shows a summary of total gallons delivered, total runoff returned, total nutrients used, and all associated costs.

INTERACTIVE DASHBOARDS

Collect all historical data and view dashboards with filters for facility, year, month, harvest, room, or recipe.

REPORT GENERATION

Generate facility-wide or room specific reports. All data is exportable, printable and can be emailed.

BUILT FOR GROWTH

Increase profits by understanding the relationship between your data and your harvests.
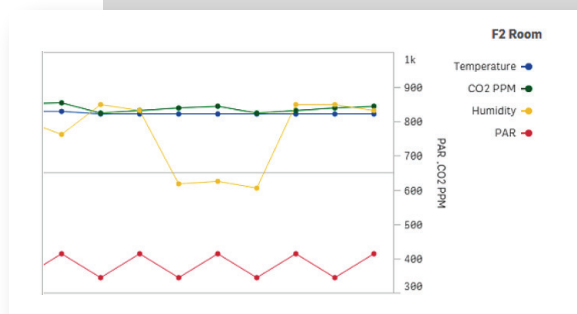

Track **USAGE & COSTS**

Total nutrient use & costs

Total water use & costs

F2 Room
- Temperature
- CO2 PPM
- Humidity
- PAR

Discover & **ANALYZE TRENDS**

FEED TRENDS

- Gallons
- EC
- pH
- Temp
- Flow rate
- Feed times

ENVIRONMENT TRENDS

- Temp
- CO2
- Humidity
- PAR
- VPD
- DLI

* Soil EC, temp, & moisture level trends are also available with sensors in place.

USE YOUR COLLECTED DATA TO DETERMINE

What your nutrient cost per harvest is •

Nutrient usage and forecasting •

How much each recipe costs you •

If certain nutrients increase yield •

TRENDS TO ANALYZE

Which changes in environment affect yield •

How your equipment performs •

Which room achieves greatest yield •

When and where deviations occur •
