

Disposal of Silicone

Information for use with Momentive's Construction Sealants & Coatings

Silicone Types

Momentive Performance Materials (MPM) manufactures a variety of silicone products in numerous forms including: flowable liquid coatings, viscous pastes, and solid pre-cured rubber parts and extrusions. The liquid coatings and single component viscous pastes will cure into chemically inert, solid rubber when exposed to air and humidity. Multiple component viscous pastes will cure into chemically inert, solid rubber when mixed in the appropriate ratio and then exposed to air and humidity.

Disposal Guidance

When disposing of these materials in their uncured as-supplied form, whether due to the product expiration or as excess waste, care must be taken to properly dispose of these materials according to federal, state, and local regulations. Please contact your regional state environmental offices for further guidance. **Due to the variety of regulations via federal, State, and/or local government, no specific method or process of waste disposal can be recommended nor endorsed by Momentive Performance Materials.**

Safety Data Sheet (SDS)

Section 13 (Disposal Considerations) of MPM's SDS for each product may offer additional information.
