

The Limb Lok from Morrison Medical

Morrison Medical's Limb Lok was designed to further ensure the safety of the patient throughout the transport process by securing the wrists of unconscious patients to a backboard strap. By securing the limbs of an unconscious patient, The Limb Lok prevents further injury in transport and allows healthcare professionals to provide optimal care.

- Secures wrists of unconscious patients to backboard strap.
- Helps protect limbs during transport.
- Strong 1" black polypropylene strap.
- 1" black plastic side release buckle.
- Adjusts to accommodate patients of all sizes.
- Minimal cost alleviates concerns of lost or left behind Limb Loks.

The Limb Lok
