

A photograph of a VPL 150 Step Lift installed on a wooden deck. The lift is a platform with a glass railing and a metal frame. It is positioned on a wooden deck with a railing. The background shows a lush green garden with trees and a hedge. The text "VPL 150 STEP LIFT" is overlaid in white, bold, sans-serif font. The word "PREMIER" is visible in the bottom right corner of the image.

VPL 150 STEP LIFT

PREMIER

VPL 150

The VPL 150 lift is a wheelchair lift also known as a low rise platform lift which provides internal or external vertical travel up to three meters. Our wheelchair lifts can accommodate changes in level from 600mm to 3000mm. In commercial and domestic environments, this lift is an ideal solution to a fully enclosed platform lift. This lift is available in a range of platform sizes.

- MODERN LIGHTWEIGHT DESIGN
- STAINLESS STEEL CONSTRUCTION
- LOW SPACE REQUIREMENTS
- HIGH LEVEL OF SECURITY
 - SIMPLE TO USE
 - NO PIT REQUIRED
- SIMPLE TO INSTALL AND EASY TO SERVICE
- OVERALL LOW MAINTENANCE AND RUNNING COSTS

INDOORS OR OUTDOOR USAGE

This energy efficient wheelchair platform lift is perfectly suited to both indoor and outdoor usage, with robust and stylish finishes ensuring it is reliable, easy to clean and durable over time. Dual controls and a post mounted call station make this super simple to operate.

WHEELCHAIR ACCESS SOLUTION

VLP 150 is specifically designed for projects with very little alterations to existing structures desired. As it has an open top design, it looks great. The brushed stainless steel finish is as standard. The lift provides a safe and easy way to access space where stairs would otherwise restrict the mobility of wheelchair users.

COMFORTABLE OPERATION

The smooth start and stop performance ensure that travel is a pleasant experience; our lifts are low-maintenance and their reliability has been proven in everyday life. The operation of the lift is completely battery-operated; the batteries are recharged at the final stations. The lift will automatically switch off after a period of time without use in order to prevent a deep discharge occurring if it has not been properly parked.

The modern touch sensitive membrane controls ensure that even people with reduced physical abilities and motor skills can operate our lifts.

SPECIFICATIONS
