### **HERCULES GOODS LIFT**

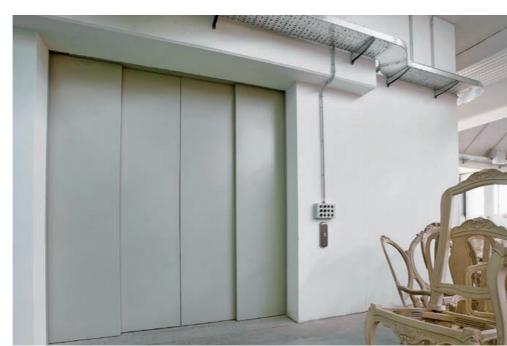

Hercules is designed to offer an easy, reliable and strong solution in goods and passenger transport between different floors in various industrial fields, in communities, in shops, supermarkets and department stores. At project stage, loads are verified through a calculation program which establishes correct dimensions and ensures capacity and duration of the machine.

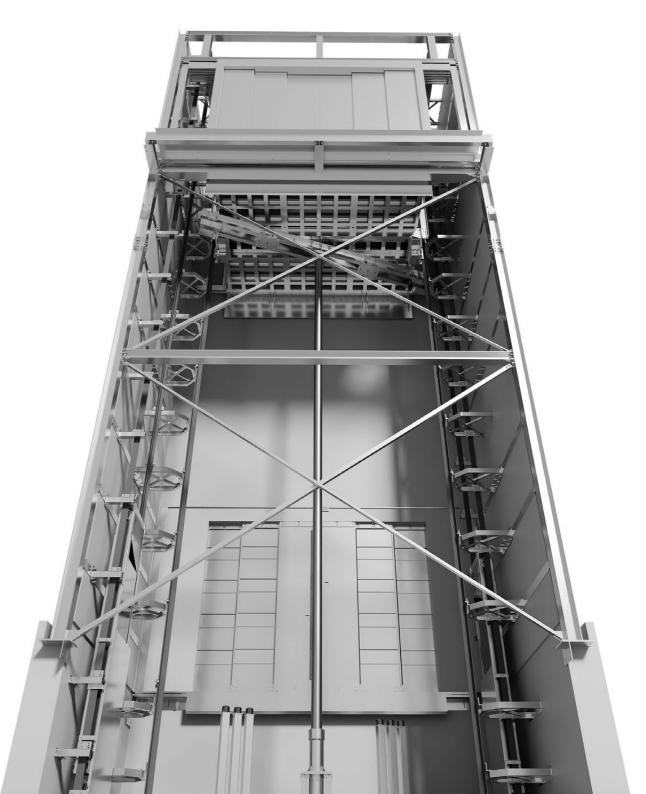

## ADAPTABLE DESIGN TO SUIT ANY CAPACITY

Hercules dimensions easily adapt to transport needs and to the installation area, with special finishing details for cabs used in hospitals (such as stretcher carriers), restaurants, hotel, also in private houses with specific goods transport needs.

PAGE 9

# HIGH-LEVEL TECHNOLOGY

Based on a high level technology, Hercules offers a high precision performance in floor stop procedures, regardless to the carried loads.

It is also supplied with reinforced thresholds, doors and frames.

Depending on the estimated working load, speed and distance to cover, it can be supplied either with hydraulic or electric traction.

#### FINISHES & CONTROLS

The cabin finishes are related to the different use conditions and to the working environment. The plate can be treated with special epoxy resins, can be coated with special materials and different colors, also to fit with the use in a peculiar environment such as chemical or food related activities. Push-buttons are easy to use, resistant and reliable.
