

# **ECO + HOME LIFT**

A truly economical solution offering low energy consumption, space saving and simple installation. With many personalisation options to suit all tastes our ECO + Lift can be a great addition to provide access to any residential space.

## SPEED: 0.15 M/S

The ECO Lift offers smooth consistent speed between floors and is in conformity with machinery directive 2006/42/CE.

# LOW PIT & HEADROOM REQUIREMENTS

Pit required can be as low as 120mm\* or ramp can be provided. Minimum headroom from the top floor FFL can be an industry leading 2270mm\*.

# TRACTION & HYDRAULIC DRIVE OPTIONS

Drive options that are suited to the user and building requirements. We work with you to provide the best option.

## RATED LOAD: UP TO 600KG \*

Different drive options offer the opportunity to increase capacity of our ECO Lift for the most intensive uses.

# TRAVEL: 5 STOPS (14.6M) \*

Suitable for most residential and public spaces with a simple, fast installation.

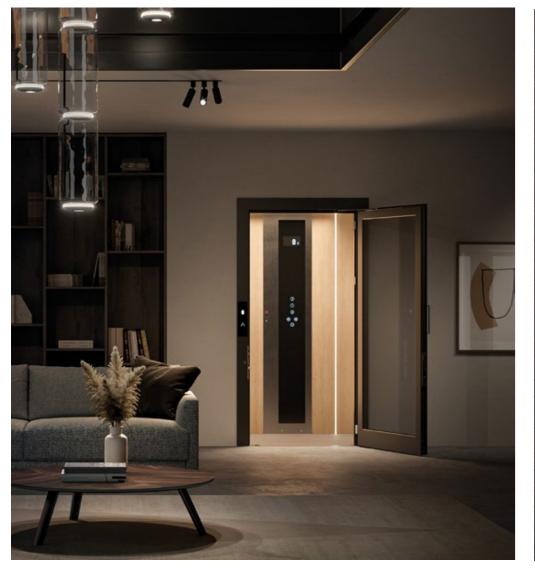

## MEETS ALL LEGISLATION REQUIREMENTS

All of our products comply with Europe's strictest safety requirements. Ensuring safety with the latest EC directives.

\* These are possible min/max values, certain drive and building requirements may limit values. See brochures technical pages or contact a sales specialist for more information.

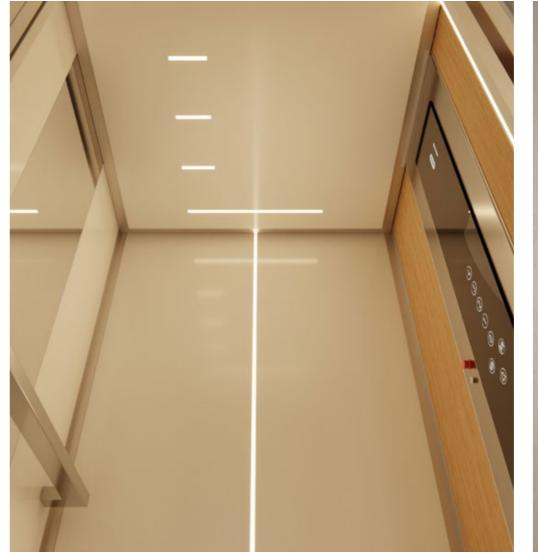

## ADD PERSONALITY WITH A RANGE OF FINISHING OPTIONS

With options such as LED Lighting, and stainless steel and glass structures it will harmonise with any building, whether traditional or modern. The lift also has an array of non-standard custom finishes to choose from, and over 100 different configurations are possible.

# WIDE RANGE OF PHYSICAL AND TOUCH CONTROL OPTION

We offer a range of control panels that can be configured with tactile psychical buttons with a bushed radial finish. We can also provide our panels with touch controls under a layer high quality glass.

Our cabins are designed with ergonomics that suit disability access in any public space. With considered control placement and braille descriptions.

# CLEAR LCD DISPLAYS

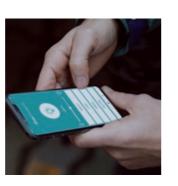

Bright, sharp LCD displays available for the landing / cabin controls.

# 72 MILLION DIFFERENT COLOURS

Through a simple app, or supplementing an already installed home automation system, the bluetooth protocol of your eco lift allows you to adjust the lighting's intensity, the light's warmth and the colour tones, configurable to 72 million different tones.

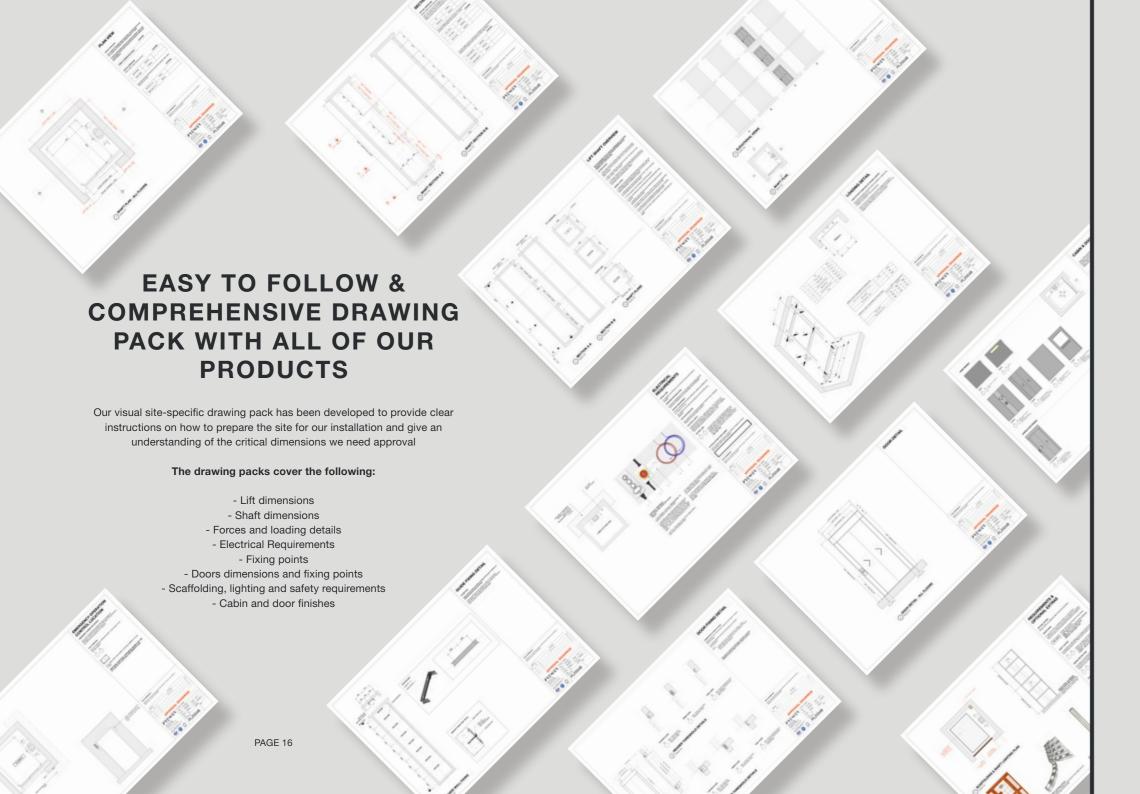

PAGE 12 PAGE 13

# STRUCTURES FOR INDOOR AND OUTDOOR USE

Our lifts can be provided with highly customisable structures. They are modular in design with different types of glass panelling to suit installations of all kinds and provide support when masonry work is unavailable. Our skilled engineering team ensures installation is completed quickly with great care to the surrounding environment.

# SIMPLE INSTALLATION

Installation is simple as building work is minimal, just a low pit is required, and headroom requirements are very low. We work to provide a speedy installation, with minimal interference to your building or the surrounding area, making sure that you get to carry on with your daily life.

# INSTALLATIONS IN HOMES ACROSS THE UK

Premier takes a personal approach to each project. From bespoke technical drawings to swift and tidy installation, we strive to ensure that all your requirements and ideas are reflected in the finished product.

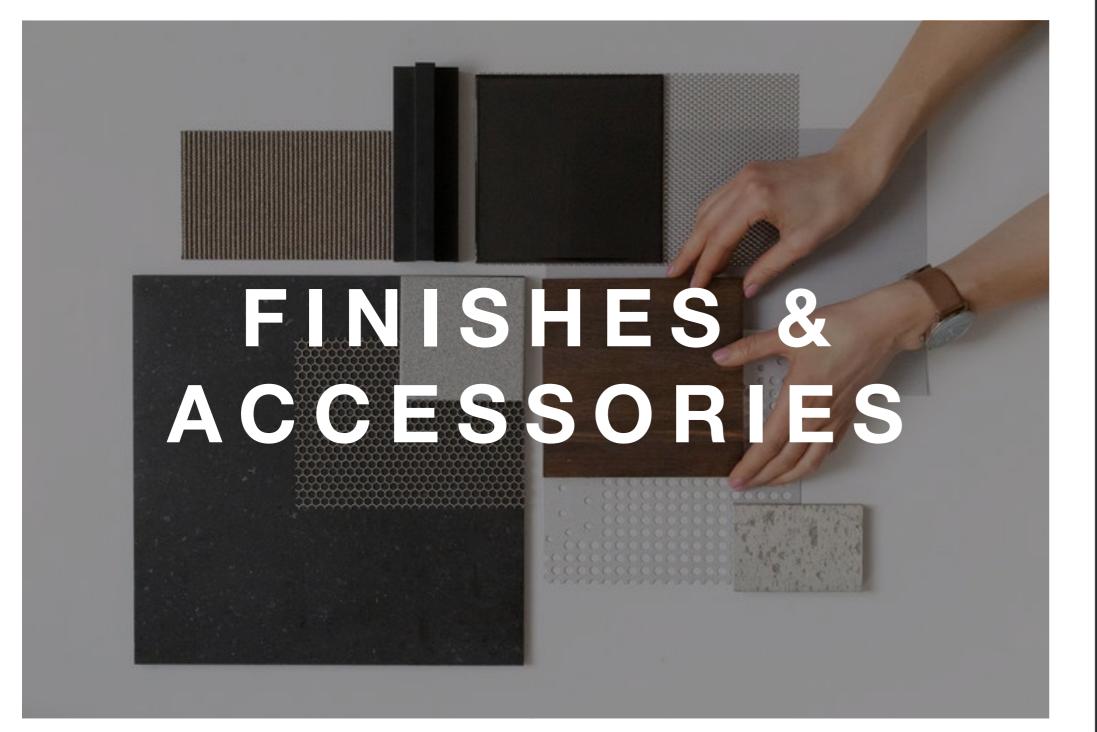

# FEATURES AND TECHNICAL DATA

### ELECTRIC HOME LIFT

The eco-friendly choice is an oil-free system, with a unique project on the market, thanks to mrl technology (machine roomless, no extra space required beyond the shaft).

SAFETY DEVICES AND BATTERIES

Full-height photocell barriers, back-up batteries to return to the landing and open the doors in case of electric power failure: the technical features are the best of the state of the art.

COMFORT AND SILENCE

The inverter provides a gentle and controlled departure and arrival. Travelling in comfort, home lift is truly quiet: all the construction details, such as the low placement of the motor, the quality of the cabin structure and the door mechanism are designed to reduce vibrations and keep noise to a minimum, for quality that lasts over time.

### UPGRADE

The ECO lift is designed to last over time. That is why all the cabin details are designed to allow upgrades in the finishes, replacements of parts, or the implementation of materials without having to disassemble the entire system: a great benefit for the whole family, or in a public space with the option of adding value and customization easily and safely.

### FAST INSTALLATION AND MAINTENANCE

From the packaging to the pre-wiring, every step is dedicated to focusing on the quality of the installation. in the case of two stops in a masonry shaft, it can be installed in less than three days. The lift is designed to ensure simplicity of maintenance, which can be carried out directly from inside the

### GENERAL FEATURES
