

Adacel Awarded New FAA Tower Simulator Upgrade Contract

New agreement will upgrade and expand the 360-degree tower simulator at critical FAA research and development center

Orlando, Florida, (September 20, 2006) – Adacel, an industry leader in simulation development, software integration, and speech recognition technology, announced today that the Company reached agreement with the Federal Aviation Administration (FAA) to upgrade the FAA Technical Center's MaxSim 360-degree air traffic control tower simulator.

As a result of this new agreement, the FAA will receive Adacel's latest simulation software that includes new procedural and operational capabilities, the most up-to-date tools for visual and voice recognition technology and ongoing support of the simulation solutions for the Airways Facility Tower Integration Lab (AFTIL) at the William J. Hughes Technical Center located near Atlantic City, New Jersey.

"Once again, we are pleased to be able to partner with the FAA on this important simulation upgrade. Without question, the work done at the FAA Tech Center is among the most important in aviation research and development anywhere in the world and we are honored to play an critical role in the ongoing development of the simulation and training tools used there," stated Fred Sheldon, Adacel CEO North America. "As we move into the next phase of the advancement of our simulation solutions, we look forward to integrating them into this important facility."

Adacel installed the original simulation system used at the FAA Technical Center in 2002 and continues to introduce the latest advances in simulation technology and capabilities in order to ensure the most impactful technology available is at the fingertips of the FAA.

About Adacel

Adacel is a global software technology and systems integration leader. The company is a leading developer of critical aviation (air traffic management), speech recognition, and defense simulation and security systems for government and business entities. Support services are available for all products including full-time, on site maintenance and operation of the systems.

Adacel's products can be found in more than 30 countries. The company is committed to innovative research and development and industry leading customer support.

Adacel was established in 1987 and listed on the ASX in 1998 (ASX: ADA). The Company's North American operations area headquartered in Orlando, Florida. Adacel has offices in Washington, D.C., Montreal Canada, Melbourne, Australia and Manchester, United Kingdom.
