

### **Adacel Named Among Top 100 Military and Training Technology Companies**

Orlando, FL (February 28, 2006) – Adacel, an industry leader in software integration, simulation development, and speech recognition technology, announced today it has been named as one of the top 100 military training and technology companies from across the United States.

The latest honor comes from Kerrigan Media International and Military Training Technology magazine. The award includes Adacel in the 2005 MT2 Top 100.

The Top 100 is a listing of companies that have made a significant impact in the military training industry this fiscal year – whether in live, virtual or constructive simulation, training or education.

“Adacel takes pride in being recognized by its peers in industry for our innovative solutions and technology,” said Fred Sheldon, Adacel North American CEO. “We are gratified to be included in this distinguished list of technology and training leaders. This recognition is a testament to the breadth and depth of the expertise of the entire staff of employees at Adacel.”

Military Training Technology invited almost 300 candidates to provide information for the award. Companies were selected based on various criteria, which, in part, included total military sales, end-user feedback, innovation and value of solutions.

This marks the first time that Adacel has been named to the MT2 Top 100.

#### **About Adacel**

Adacel is a global software technology and systems integration leader. The company is a leading developer of critical aviation (air traffic management), speech recognition, and defense simulation and security systems for government and business entities.
