SRI International Licenses DynaSpeak Speech Recognition Software to Adacel for Aviation Applications

MENLO PARK, Calif. –September 13, 2006 – SRI International, an independent nonprofit research and development organization, announced today that Adacel , an industry leader in simulation development, software integration, and speech recognition technology, has obtained an exclusive license for SRI's DynaSpeak[®] speech recognition system for selected aviation voice-activated cockpit and mission specialist applications.

DynaSpeak is a speaker-independent speech recognition engine that scales from large to embedded applications in industrial, consumer, and military products and systems. It incorporates techniques developed and patented by SRI that yield highly accurate speech recognition, computational efficiency, and robustness in high-noise environments.

Adacel is integrating DynaSpeak into aviation applications developed for pilots, crewmembers, mission specialists and unmanned aerial vehicle (UAV) operators. This will enable these individuals to use speech recognition as an alternative interface with displays, databases, communications, and command and control. By using voice commands, both flight personnel and specialists can configure instrumentation, navigation, database and other operational flight deck and aircraft functions.

“Allowing flight crewmembers, and specialists the option of using voice commands to control specific functions of their aircraft and its systems provides a safer, faster way to accomplish their mission,” said Fred Sheldon, Adacel’s CEO, North America. “SRI, a world-renowned developer of speech-recognition technology, is a complementary partner in the development of airborne speech technology.”

More information about DynaSpeak and other SRI speech technologies available for license can be found at www.speechatsri.com

About Adacel

Adacel is a global software technology and systems integrator. The company is a leading developer of critical aviation, speech recognition, and defense simulation and security systems for government and commercial enterprises. Support services are available for all products including full-time, on site operation and maintenance.

Adacel (ASX: ADA) was established in 1987. The company’s products can be found in more than 30 countries. Adacel’s North American operations are headquartered in Orlando, Florida and has offices in Washington, D.C., Montreal Canada, and Melbourne, Australia.

More information about Adacel can be found at www.adacel.com

About SRI International

Silicon Valley-based SRI International (www.sri.com) is one of the world’s leading independent research and technology development organizations. Founded as Stanford Research Institute in 1946, SRI has been meeting the strategic needs of clients for 60 years. The nonprofit research institute performs client-sponsored research and development for government agencies, commercial businesses, and private foundations. In addition to conducting contract R&D, SRI licenses its technologies, forms strategic partnerships, and creates spin-off companies.
