**Adacel and Mexican Air Force Renew Business Relationship**

**Montreal, Quebec, Canada, May 19 2022**—Adacel Technologies Limited (**Adacel**), an industry leader in advanced air traffic management solutions and simulation and training systems, is pleased to confirm the renewal of its business relationship with the Fuerza Aérea Mexicana (**Mexican Air Force**) with the signing of a new support contract for its simulation and training systems.

The Mexican Air Force has been using Adacel's training systems since 2018, including MaxSim 3D Tower, a 360° system, and MaxSim Radar. In addition, the organization has been using Adacel proprietary Intelligent Communication Environment (ICE), an English and ICAO phraseology trainer. Under the newly executed contract, Adacel will evaluate, update, and support these systems via its technical team in Orlando, FL.

Speaking of the new contract, Daniel Verret, Adacel's CEO shared: "We value our relationship with the Mexican Air Force and are happy to welcome them to our Support team: we are committed to our customer's success. Latin America is an important strategic region for Adacel, and we look forward to further building on our relationship with the Mexican Air Force."

**About Adacel:**

**About Adacel:**

Established in 1987, Adacel is a publicly traded company listed on the ASX. The company plays a significant role in global air space safety. A world-leader in its industry, Adacel applies cutting-edge technologies to develop advanced air traffic control simulation and training systems and state-of-the-art air traffic management solutions. Adacel's customers include international air navigation service providers (ANSPs), military, defense & security organizations, universities, and airport authorities. More than 21% of the world's airspace is managed with Adacel's Aurora ATM software. MaxSim Tower Simulator and Training systems lead the industry with the highest number of installations worldwide. Adacel's latest flagship system, a digital Air Traffic Control (ATC) tower system delivers a wide spectrum of digital tower operational solutions, from consulting services to system design, development, deployment, and support.
