**Adacel to showcase latest tool at Airspace World 2024**

**Melbourne, Australia – 06 March 2024** – Adacel Technologies Limited. (**Adacel** or the **Company**), an industry leader in advanced Air Traffic Management (ATM) and Air Traffic Control (ATC) simulation and training solutions, is pleased to announce the Company's participation at Airspace World in Geneva, Switzerland, March 19-21, 2024. Adacel's exhibit will be located at stand #L15.

In addition to showcasing latest developments in Aurora, MaxSim, and Reval, Adacel is unveiling its latest tool, FAST – Framework for Accelerating System Training.  FAST is designed to provide real-time training and testing solutions to operational ATM systems.  Driven by Adacel's state-of-the-art MaxSim simulator engine, FAST interfaces with ATM systems to augment and enhance the training process.  FAST has a variety of applications, some of which include:

- Evaluating concepts of operation and de-risking implementation.
- Validating operational procedures based on realistic traffic scenarios in a representative Controller Working Position (CWP) environment.
- Interfacing with existing systems to simulate training scenarios, emergencies, higher traffic levels, and new ATC procedures.
- Providing a solution for performance or capacity testing.

"We are thrilled to reunite with our industry peers, partners, friends, and customers at this year's Airspace World," shares Daniel Verret, Adacel's CEO. "Our team's hard work has led to remarkable progress with our products, and we can't wait to showcase our latest innovations during the show," continues Mr. Verret.

Neil Bowles, Adacel's new Vice President, Air Traffic Management said, "I'm excited to be back at Airspace World and looking forward to our industry's flagship event. Adacel's ATM products enable safe and efficient operations from oceanic airspace to innovative digital tower implementation. We are ready to welcome visitors to our stand where they can meet our team and see how tools such as FAST can accelerate system training and help define new concepts of operation."

**About Adacel:**

Established in 1987, Adacel is a publicly traded company listed on the ASX. The company plays a significant role in global air space safety. A world-leader in its industry, Adacel applies cutting-edge technologies to develop advanced air traffic control simulation and training systems and state-of-the- art air traffic management

solutions. Adacel's customers include international air navigation service providers (ANSPs), military, defense & security organizations, universities, and airport authorities.

More than 21% of the world's airspace is managed with Adacel's ATM software. MaxSim Tower Simulator and Training systems lead the industry with the highest number of installations worldwide. MaxSim is also the first ATC simulation system in the world to deliver Virtual and Mixed Reality training capabilities into the classroom. Adacel's latest flagship system, REVAL, a digital Air Traffic Control (ATC) tower system delivers a wide spectrum of digital tower operational solutions, from consulting services to system design, development, deployment, and support.
