

# A digital view of the global oil supply chain

The oil trader's edge is no longer “boots on the ground” but “eyes in the sky”. We combine conventional oil statistics with real-time data from satellites and marine intelligence to deliver an accurate measurement of the global oil market.

## THE PROBLEM WE SOLVE

### REAL-TIME DATA

Oil trading markets operate in real-time but current data is lagging by up to 3 months.

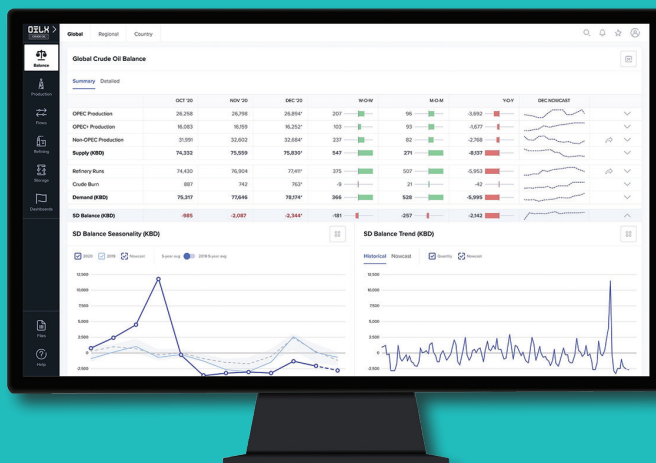

### ADVANCED OIL ANALYTICS

Deep sector expertise and advanced analytical capabilities are required to meaningfully process oil market data.

### TRADING EFFICIENCY

Current analysis methods are time consuming, prone to human error and don't operate 24/7.

## INTRODUCING THE OILX PLATFORM THE WORLD'S FIRST DIGITAL OIL ANALYST

Our web-based platform creates the most comprehensive and coherent visualization of the global oil market. We consume and interpret satellite data with AI technology to bring you advanced oil analytics, when you need it.

# GIVING OIL TRADERS AN EDGE

Gain confidence in decision making with a platform built by experienced oil trading professionals, to improve efficiency and to maximise returns.

- ✓ Independent and unbiased view of global oil markets
- ✓ Dynamic supply demand balances with integrated cargo tracking and inventory monitoring
- ✓ Real-time oil barrel tracking, from oil field to refinery
- ✓ Reduces analysts' workload, leaving more time for strategic thinking
- ✓ Integrate our data seamlessly into your own systems with API or CSVs

**OILX**<sup>®</sup>

## HOW IT WORKS

### 1. SMART DATA FUSION

We combine and curate oil statistics with satellite and shipping data to produce real-time, analysis-ready oil data on a global scale.

### 2. DIGITAL TWIN

We mirror our data to match the oil supply chain – providing production insights from well to refinery. We test the results against market standards.

### 3. DIGITAL OIL ANALYST

Navigate global oil markets with speed and confidence through one single platform for simple and fast oil data interpretation.

#### SAVE TIME

30% reduction in average oil analyst's workload.

#### OPTIMIZE RESOURCES

Reduced subscription cost and more productive teams.

#### IMPROVE DATA QUALITY

Validated and back-tested data by our own expert oil analysts.

## OUR TEAM

OilX has been designed by expert oil analysts with decades of experience in global oil trading. Our team work hand in hand with outstanding data scientists and are supported by a global network of industry leading experts in oil trading, shipping, earth observation and technology.
