Welcome to Schweigen

Schweigen is the leading German manufactured, Australian owned kitchen appliance brand. Designing Australia’s most efficient silent rangehoods, we have built a reputation by providing innovative, stylish and premium appliances for every household.

Our revolutionary silent rangehood systems work by removing the fan and motor from the rangehood and mounting it outside the home. The only resulting sound in your kitchen is the airflow being pulled through the filters and ducting.

The Schweigen Isodrive® motors are amongst the most energy efficient in the market, requiring just 57 watts of power to run, in comparison to competitor products which use a minimum of 180 watts. With sleek designs, extreme durability, and versatile features, our products combine the best of European styling and Australian resilience. Silent, powerful, stylish and efficient - what more could you want from a rangehood?
“We have built an enviable reputation by offering the finest silent rangehood solution in the market today. Our partnership with European designers and manufacturers allows us to continue to bring quality appliances with outstanding value to Australian homes.”

Anthony Fletcher.
Managing Director, Schweigen
Benefits of a Schweigen silent rangehood

SILENT
The Isodrive® motor is silent - removed from the rangehood and mounted outside the home.

AUSTRALIAN OWNED
We are an Australian owned, family business, that prides itself on delivering quality products built for the harsh Australian climate.

MANUFACTURED AND ENGINEERED IN GERMANY
Built with quality and precision, the Schweigen silent Isodrive® guarantees performance and reliability for many years to come.

10 YEAR WARRANTY
Offering customers peace of mind with a full 10 Year Warranty on all Isodrive® motors.*

POWERFUL
Our rangehoods extract heavy steam, smoke and unwanted cooking odours, leaving your kitchen fresher for longer.

ENERGY EFFICIENT
Using a mere 57 watts to deliver high powered efficiency and energy savings of more than 300%.*

* Isodrive® motor has a 10 year product warranty. This Warranty covers fan and motor units only. For more information please refer to your warranty card. Excluding the BR500. ** Efficiency varies between power options.
LIFETIME FILTER WARRANTY
Easy to remove, dishwasher safe, and guaranteed for the life of the filter.***

LIFETIME LED LIGHT REPLACEMENT
We are so confident our energy efficient LED lights will stand the test of time, we provide a replacement warranty for the life of your rangehood.***

FREE DUCTING
Schweigen makes purchasing a rangehood easy. Every rangehood package includes a custom acoustically matched ducting kit comprising of quality, fire resistant materials.

COMPLETE VENTILATION SOLUTIONS
From indoor to outdoor rangehoods, externally mounted to in-wall motors, Schweigen has all your ventilation needs covered.

GOLD SPONSOR OF KBDI
Schweigen is proud to be an official Gold sponsor for the Kitchen & Bathroom Designers Institute.

SERVICE & INSTALLATION
An Australian based Customer Support team offers you the service and installation network you’d expect from such a premium product.***

*** The period during which the Lifetime Filter Warranty is in effect will depend upon the life of your appliance. *** The period during which the Lifetime LED Light Replacement is in effect will depend upon the life of your appliance. **** Does not apply to remote and rural areas in Australia.
“Schweigen has always been committed to providing products which focus on design excellence. To enhance the quality of my kitchen designs, I want to be able to choose a brand that I can trust. Every Schweigen rangehood is built according to the highest European standards, a reassurance that I can pass onto my clients.

Simple yet elegantly designed, Schweigen rangehoods are integrated seamlessly into the modern kitchen and convey innovative technology. Current trends see island bench-tops turning the kitchen into the hub of the home. The key benefit of a silent Schweigen rangehood means you don’t have to speak over a noisy appliance, making the kitchen especially inviting to family and friends.

Although silent, a Schweigen rangehood proves incredibly powerful, providing the optimal solution for the family home. This allows for experimentation with international cuisine without the worry of lingering odours throughout the home.

The commitment to design without compromising on functionality is why I chose to be the brand ambassador of Schweigen and why I recommend a silent rangehood to all my customers.”

MAL CORBOY
Schweigen brand ambassador
International award winning interior designer
Schweigen sets new standards in ventilation by moving air intelligently and silently. We strive for the perfect harmony between technology, aerodynamics, and electronics. As a result of this, we produce the most powerful, efficient and silent rangehood products on the market.

Our German engineered and manufactured Isodrive® motor has been designed from the ground up, using the upmost precision. With aerodynamics and aeroacoustics being our main priority, we have collaborated with world leaders to achieve the results we want. Continual investment in new simulation tools and testing facilities ensures every component of our product is designed to take on the harsh Australian environment.

We pride ourselves on selling products that are exceptional in durability and quality. Constructed with high quality stainless steel and using the latest in manufacturing technology, Schweigen silent rangehoods are built to last and will look amazing in years to come.

German Engineered and Manufactured

Innovation and detail come together to create an exquisite, unique collection of rangehoods, where silence, functionality and quality are our insignia.

*Schweigen products are distinguished by outstanding design and superior quality. In order to emphasise this claim, we provide a three-year guarantee for our rangehoods and a ten-year warranty for the Isodrive® motor.
The Schweigen silent story

The Schweigen silent rangehood solution is revolutionary, starting with a German fan and motor assembly, and acknowledged as the most quiet, efficient, and powerful domestic extraction unit available.

Few of our competitors can deliver a silent solution because they don’t offer the same system.

We call it Isodrive®.

Schweigen’s patented Isodrive® solution takes the fan and motor out of the rangehood and mounts them outside the home on the roof, wall or eave. We also incorporate an ‘s’ bend into the flexi-ducting, which creates an easy solution for all installation requirements, while reducing noise and vibrations.

The only resulting sound you may notice in your kitchen is the airflow being pulled through the filters and ducting. The noise that is generated outside is overwhelmed by the ambient environment.

We provide a motor ‘housing’ to protect the motor from weather elements. It is manufactured from the most highly durable ASA plastic or Colorbond® steel exclusive to Schweigen rangehoods.

Our filters are high quality too, and come with a Lifetime Warranty. We offer baffle and mesh filters that are easy to remove and safe to clean in the dishwasher.
No motor within the rangehood

Motor mounted outside the home

// External motor can be installed on the wall. Please refer to your user manual for installation instructions.

Schweigen rangehood. UM1170-9S // kitchen design. Rara Architecture // photography. Alison McWhirter
The silent Isodrive® motor system is engineered using the most advanced German made EBM motor and fan. Each of the different Isodrive® motor housings have been developed to carefully consider the best airflow. Built with a centrifugal fan, the Isodrive® motor system is designed to pull, rather than push the air through the rangehood. As a result, there is less airflow resistance, which enables the Isodrive® system to run more efficiently than a standard rangehood motor.

The patented motor system is available in 6 different extraction sizes to cater for all cooking needs.

The Isodrive® 650 motor has been designed for light cooking such as boiling pasta, steaming vegetables and grilling chicken. For the more moderate cooks out there, we have the Isodrive® 900, suited for grilling steaks, shallow frying and baking casseroles. Designed for heavy cooking such as wok frying, heavy steaming and grilling, the Isodrive® 1600 is the perfect match for any Asian or Indian dish, as well as induction cooking.

We have extended our silent Isodrive® range to cater for home owners where installing a motor and ducting outside the home is not possible.

The Endline Isodrive® motor is perfect for double storey buildings or apartments as it can be installed into an external wall.

For our ceiling cassette and alfresco range we offer the Isodrive® 3000 and Isodrive® 3200 motor combinations.

Built with superior quality and precision, the Schweigen silent Isodrive® guarantees performance and reliability for years to come, that is why all Isodrive® motors come with a 10 year peace of mind warranty.
The terms ‘energy efficient’ and ‘suction’, are often confused. Greater efficiency is often mistaken for greater suction. This is both incorrect and misleading.

Greater suction can be easily achieved by applying more power. However, an increase in power leads to the consumption of more energy, making it less energy efficient.

Ideally, an appliance that requires the least amount of energy to complete the task at hand, is the most efficient. This is where Schweigen excels. The Isodrive® motor is not only the quietest extraction system, it is also the most energy efficient as the air is pulled through the system rather than pushed.

As a result of the Isodrive® design, the Schweigen silent rangehood systems use less energy to achieve the same task as traditional rangehoods. Traditional rangehoods use roughly 190 watts or more, whereas the Isodrive® 650 motor system paired with LED lighting runs on a mere 57 watts.

That’s 3 times more efficient than a traditional rangehood!
If you have a smaller kitchen or prefer a sleek minimalist style, then you could choose one of our elegant undermount designs. If you have the space, we recommend a wall mount design. A kitchen island or peninsula bench-top layout is complimented best with an island hood or a ceiling cassette design. These can also be built into a bulkhead to create a bold statement.

The width of the rangehood needs to adequately accommodate the cooktop underneath it in order to optimise airflow extraction.

Choose a motor power option that will accommodate your cooking style: Light, Moderate, Heavy, Supreme or Extreme. Once you select a motor power you will finally enjoy a silent kitchen.

1. **Choose your rangehood style**
2. **Choose your cooking type**
3. **Free ducting + peace-of-mind warranties**

**The 3 steps to choosing a Schweigen silent rangehood.**
1 Choose a rangehood style that suits your kitchen design

- Wallmount
- Ceiling Cassette
- Island
- BBQ Alfresco
- Undermount
- Multi-purpose Fan

2 Choose your cooking type to match with the perfect Isodrive® motor

- **Light cooking**
  Boiling pasta, steaming vegetables, grilling chicken
  Isodrive® option – S1 650

- **Moderate cooking**
  Grilling steak, casseroles, shallow frying
  Isodrive® options – ST 900

- **Heavy cooking**
  Asian stir-fry, Indian curry, deep frying
  Isodrive® options – SP 1600 // SP 2300 // SE 3200

3 Enjoy free ducting and peace-of-mind warranties

Schweigen rangehood. UM1170-9S
// kitchen design. Minosa // photography. Nicole England
Undermount rangehoods have revolutionised the way we look at modern kitchen design. Hidden underneath cabinetry, Schweigen undermount rangehoods are neither seen nor heard as they actively extract airborne grease, oils and odours from your kitchen. The concealed design of these rangehoods is perfect for those who desire a fully integrated kitchen - enhancing continuous, sleek, modern lines.
Undermount Rangehood // UM1170-6S, UM1170-9S // 60cm & 90cm // SILENT

Perfectly designed for discreet mounting inside overhead cabinets, the popular UM1170 fits perfectly into your kitchen cupboards and is ideal for when space is limited, or where the rangehood needs to be out of sight.

Convenient stainless steel push button controls operate the 5 speed settings, LED lighting and 15 minute delay timer with auto shut-off, while dishwasher-safe mesh filters offer easy maintenance.

DESCRIPTION

• stainless steel finish
• silent Isodrive® motor system
• soft-touch controls, digital display
• 5 x speed levels
• 15 minute delay timer with auto shut-off
• 2 x LED lights
• stainless steel, dishwasher safe filters
• 3 Year Warranty on Canopy

TECHNICAL DATA

  - 200mm flexi ducting (6m)
  - install roof/wall

*Note: The UM-12UMS uses the SP 1600 only.*
Undermount Rangehood // UM-PA9S // 90cm // SILENT

This sophisticated undermount provides powerful performance, while being discreetly mounted inside cabinetry. The UM-PA9S features an innovative ambient LED lighting system which allows for safe, clear vision while cooking.

One of the advantages of the UM-PA9S is the additional power of Perimeter Aspiration which targets air extraction towards the perimeter of the rangehood creating a smaller and more intense extraction area.
Undermount Rangehood for deeper cabinets // UM1390-6S, UM1390-9S, UM1390-12S // 60cm, 90cm & 120cm // SILENT

Simply discreet and concealed, this most recent addition to Schweigen's classic range is specially designed for the ultimate extraction of unwanted odours and cooking vapours.

The UM1390 fits deeper into cabinetry than most other undermount rangehoods. Due to its larger extraction zone, this model is simply exceptional in the removal of fats, oils and grease, leaving your kitchen fresher for longer.

DESCRIPTION

When thinking of a conventional rangehood, the wallmount style is one that usually comes to mind first. Traditional & timeless in their design, wallmount rangehoods are a highly functional solution as the back wall and surrounding cabinets help direct the steam and aromas directly into the hood. Wallmounts are undoubtedly renowned for their excellent performance and continue to impress with their capacity to make a culinary statement.
The DS3131S and KLS-3131RS deliver high performance and style with silent and powerful extraction capability. The striking blue or red neon illumination strip creates a beautiful visual statement in any kitchen, forging a perfect union of form and function.

Other convenient features include soft-touch controls with 5 speed levels and a 15 minute auto shut-off timer, so you can leave the kitchen and the rangehood will switch off after clearing the air.
The WM3150-6S and WM3150S rangehoods are strikingly contemporary in appearance and provide remarkable performance. The twin LED downlights illuminate the cooking area while the commercial grade stainless steel filters thoroughly trap oils and grease. Soft-touch controls are clearly visible and easy to use. 15 minute delay automatic shut-off timers enable you to enjoy your meal while unwanted food odours continue to be silently removed from the cooking area. This rangehood has been elegantly and stylishly designed, making it the visual highlight of any kitchen. Like a breath of fresh air, this striking rangehood quickly and quietly whisks away kitchen smells and odours.
This ultra-modern and stylish wall canopy with stainless steel and black tempered glass fascia will stand out from the crowd. On trend with contemporary modern kitchen design, the DS3326-9S boasts silent and powerful extraction capability.

This state of the art rangehood features Perimeter Aspiration Technology which targets air extraction towards the perimeter of the rangehood, creating a smaller and more intense extraction area. Other convenient features include touch sensitive controls with 5 speed levels and a 15 minute auto shut-off timer, so you can leave the kitchen and the rangehood will switch off after clearing the air.

**DESCRIPTION**
- stainless steel finish
- silent Isodrive® motor system
- touch sensitive control, digital display
- remote control
- Perimeter Aspiration
- 5 x speed levels
- 15 minute delay timer with auto shut-off
- 4 x LED lights
- 1 x aluminium, dishwasher safe mesh filter
- 3 Year Warranty on canopy

**LIMITED WARRANTY**
- 10 years motor system
- 5 years motor system (if installed in roof/wall).
- 3 years motor system (if installed in eaves).
- 2 years motor system (if installed in roof/wall/eaves).
- 1 year filter and motor system.
- 1 year ducting.
The sleek, grand WM-EX90S combines the power of the iconic German engineered silent Isodrive® motor, the style of its European innovative design, and the intelligence of Perimeter Aspiration.

With the canopy’s modern, square-edged European influence, this wallmount feature creates a contemporary European statement in any kitchen. The glass extraction shutters are the stand-out element with smoke and steam directed and contained within the canopy area, allowing more control and optimised ventilation.

Geometric design sits at the forefront of modern kitchen trends, and the DS3170S excels in this domain. This wallmount rangehood is perfect for those who seek a contemporary, culinary feature, whilst enjoying the pleasures of family conversations without interruption.

Efficient LED down lights illuminate the cooking area, whilst commercial grade filters thoroughly trap oil and grease. The DS3170S features soft-touch digital controls that are convenient to use, with 15 minute delay automatic shut-off to make entertaining effortless.
The WM2190 boasts an influence of Italian design for professional cooking with the utmost element of style. The pyramid shaped angles and stainless-steel finish makes a striking visual statement in any kitchen. Fan speed is controlled by the stainless steel selector switches on the front of the canopy. Designed to minimise the edges where grease and oil can lodge, Schweigen’s high-quality filters are easy to remove and dishwasher safe, coming with a lifetime warranty.

Due to the increase of open-plan living, entertaining for family and friends has been taken to the next level. Island kitchens have evolved as the ideal kitchen design solution, playing an essential role in complimenting your social lifestyle. Not only does an island canopy enhance the art of entertaining, it makes for an outstanding kitchen feature. Schweigen’s island range stands as the most silent, powerful and efficient on the market.
Island Rangehood // IS4160S // 90cm // SILENT

The aesthetically dynamic, easy to use IS4160S will enhance any open-plan kitchen. A prominent feature of this model is the exquisite geometric design that also delivers a multitude of benefits. This includes silent extraction, striking illumination and a large filtration area, so you get the best of both worlds – form and function.

With a stunning stainless steel finish, easy clean soft-touch controls and the iconic silent Isodrive® motor, we ensure that the IS4160S rangehood will perform at its peak for years to come.

DESCRIPTION

TECHNICAL DATA
IS4160S
• dimensions: (W x D) 898 x 660 mm
• 4 x mesh filters
The IS4140S has unique eye level front control switches which help avoid oil build-up that often causes havoc with switches mounted beneath rangehoods. The easily cleaned internal chamber is a major benefit as it helps keep the rangehood free of smells from internal oil build-up.

If you’re looking for design flair coupled with maximum efficiency, look no further than the IS4140S rangehood. On the lowest speed, this rangehood produces enough airflow to ensure highly effective suction.
You couldn’t ask for more with this strikingly designed rangehood. Adapting European design and German engineered silent technology, the IS4110S is less bulky than many of the traditional style rangehoods. As most canopies tend to make a room feel smaller, the IS4110S does the opposite and is able to open up an entire kitchen space. The angular look of this rangehood has become extremely popular in modern kitchens, boasting features such as soft-touch eye level controls, stainless steel finish and a 15 minute delay timer with automatic shut-off.

**DESCRIPTION**

  - install roof/wall
In modern times, kitchen layout has been revolutionised by the way we engage with each other in the dining space. Cultural and societal views of the 1950’s had fundamental influence on separating cooking and dining areas in the home. However, there started to become a demand for communal living, perhaps mostly related to the era of the baby-boomers. Architect and Interior Designer, Frank Lloyd Wright, discovered a reason and solution for our fascination and growing interest, therefore creating the Kitchen Island.

Technological influences allowed for shifts in design trends and more advanced kitchen appliances. The concept of cooking as a way of bringing friends and family together to entertain and socialise, led to open-plan living - integrating cooking with dining. The development of Interior Design has formed Island Kitchens into all different shapes, sizes and heights, reinventing the style of how we dine and utilise space.

With Island bench-tops being increasingly popular, there has been a demand for the correct ventilation to compliment this design. Island canopies and ceiling cassettes have proved to be the most popular, not only removing oils, grease and odours, but as a design statement to enhance any kitchen. Consequently, the innovation of ceiling cassettes has become increasingly popular with kitchen designers travelling back to the original concept of creating space with open-plan living.
Schweigen rangehood UM422G-12s
// design, PM Concepts // photography, RiaRyan Photography
A Ceiling Cassette is one of the most advanced rangehood designs in the kitchen appliance industry today. Their style and technology focused features mean they are renowned amongst designers and industry professionals alike. A cassette seamlessly integrates within the ceiling and provides an effortless, functional, and innovative extraction solution. This style of rangehood suits those who prefer a spacious, open, and harmonious kitchen whilst incorporating grand, yet understated features.
Ceiling Cassette // UM1000-1S // 100cm // SILENT

The stylish and sophisticated UM1000-1S ceiling cassette sits perfectly over island or peninsula style kitchen benches. Featuring a sleek stainless steel finish and powerful extraction, this beautiful hood will add a touch of contemporary glamour to your overall kitchen style.

Featuring Perimeter Aspiration Technology, air flow is targeted towards the perimeter of the rangehood, creating a more intense extraction area. Designed to minimise the edges where grease and oil can lodge, Schweigen's high-quality filters are easy to remove and dishwasher safe, coming with a lifetime warranty.

DESCRIPTION
• stainless steel finish
• silent Isodrive® motor system
• Perimeter Aspiration
• ceiling/bulkhead cassette rangehood
• aluminium, dishwasher safe filters
• free ducting
• 3 Year Warranty on Canopy
• wall switch operation
• no electronics in rangehood
• single speed

TECHNICAL DATA
UM1000-1S
• stainless steel dimensions: (W x D)
  1000 x 700 mm

MOTOR OPTIONS
• SP 1600
  - single external motor
  - 1600 m³/h airflow
  - 200mm flexi ducting (6m)
  - install roof/wall

• SE 3200
  - single external motor
  - 3200 m³/h airflow
  - 250mm flexi ducting (4m)
  - install roof/wall

*Note: Wall switch is not provided. For a lasting quality finish in your kitchen, Schweigen recommends a water repellent paint type on walls and ceiling surrounding.
Ceiling Cassette // UM4220-12S, UM422G-12S // 120cm // SILENT

The UM422G-12S ceiling cassette is a combination of innovative silent technology and sleek, modern kitchen styling. The ceiling cassette is finished in stainless steel with black glass doors, making it both aesthetically pleasing and practical in its performance. Featuring 6 down-lights, your cooking area is completely illuminated while you cook for your guests.

One of the advantages of this ceiling cassette is the use of Perimeter Aspiration which targets air extraction towards the perimeter of the cassette creating a smaller and more intense extraction area. Remote control easily operates the ceiling cassette with the added benefit of a fifteen-minute automatic delay timer.

DESCRIPTION
• black glass or stainless steel finish
• ceiling/bulkhead cassette rangehood
• silent Isodrive® motor system
• Perimeter Aspiration
• remote control operation*
• 4 x speed levels
• 15 minute delay timer with auto shut-off
• 6 x LED down lights
• 2 x aluminium, dishwasher safe filters
• 3 Year Warranty on canopy

MOTOR OPTIONS
• SP 1600
  - single external motor
  - 1600 m³/h airflow
  - 200mm flexi ducting (6m)
  - install roof/wall
• SP2 3000
  - twin external motor
  - 3000 m³/h airflow
  - 200mm flexi ducting (6m)
  - install roof/wall
• SE 3200
  - single external motor
  - 3200 m³/h airflow
  - 250mm flexi ducting (4m)
  - install roof/wall

*Note: This model is controlled by remote control only. For a lasting quality finish in your kitchen, Schweigen recommends a water repellent paint type on walls and ceiling surrounding.

TECHNICAL DATA

• stainless steel dimensions: (W x D) 1200 x 700 mm

UM422G-12S
• stainless steel & black glass dimensions: (W x D) 1200 x 700 mm

*Note: This model is controlled by remote control only. For a lasting quality finish in your kitchen, Schweigen recommends a water repellent paint type on walls and ceiling surrounding.
Recently, Australian homes have revolutionised the outdoor living space, making it one of the most important areas for entertaining. Whether hosting a barbecue, or cooking for friends and family, Schweigen’s BBQ Alfresco rangehoods enable you and your guests to experience a smoke and grease free environment. Australian families and barbecue enthusiasts are now able to enjoy restaurant quality, alfresco dining with functionality and style.
This incredibly powerful, stately wallmount rangehood comes in two measurement options of 120cm & 150cm. With twin, in-built motors providing a powerful airflow of 2700m$^3$/hr, these rangehoods boast a match of performance with visual appeal. The CL8812 & CL8815 are built with the highest quality, robust stainless steel, and are specifically designed to withstand the harsh Australian environment. The innovative pyramid design consists of a considerably large extraction zone, effectively capturing smoke and grease over any barbecue with the touch of easy-push button controls.
Schweigen’s undermount CLUM10 & CLUM12 boast power, innovative design and durability. Using only the finest 304 grade stainless steel, these alfresco rangehoods are made considerably more durable for use in an outdoor room or under-cover patio. Their sleek, undermount design integrates seamlessly into any alfresco cabinetry and outdoor dining area. With easy-to-use, push button controls, you are able to choose from 3 powerful speed levels originating from the twin, in-built motors. The CLUM10 & CLUM12 ensure efficient extraction of heavy smoke and grease created from any Australian barbecue.
The CL6272 wallmount alfresco rangehood prides itself on being a pyramid of excellence. Focusing on modern demands of alfresco dining, this model accentuates innovation, power and quality. Using high grade 304 stainless steel, this canopy is more durable for use in an outdoor room or under-cover patio. With twin, in-built motors, the CL6272 provides a powerful 2200 m³/hr of airflow, delivering efficient extraction of steam and smoke to make for a fresh, clean outdoor living space.
When it comes to outdoor living, the CL7272S & CL7275S pride themselves on delivering optimal performance and precision. Using Schweigen’s German Engineered Isodrive® technology, these stunning rangehoods bring powerful yet silent extraction to your cooking environment. Most notably, the CL7272S & CL7275S make a statement in design with their clean, modern lines and simple geometric shapes. Using robust high grade 304 stainless steel, these models deliver durability and excellence for any outdoor space or under-cover patio. These grand wallmounts are for entertainers who want to make a bold statement in their outdoor living area.
Silent Multi-Purpose Exhaust Fan
Ideal for every household, this unit can be installed and vented into 2 rooms - by utilising the optional DVK500 kit. With silent operation, your bathroom and laundry will stay fresh and odour-free.

The revolution starts with a German made EBM motor and fan which is recognised as the quietest, most efficient and highest-powered domestic extraction unit available today. However, even the quietest motors and fans on the market still generate noise. Using Schweigen’s renowned concept of placing the motors externally on your roof or eaves, you can easily achieve silent operation of all household extraction units.
SELECTING THE RIGHT SILENT RANGEHOOD MOTOR

To maximise the performance of your rangehood, it is important to select a motor power option that suits the cooking technique you use the most.

Dishes high in spice ingredients or with intense smoke generated from a wok or grill, require much stronger extraction power to perform effectively.

The table below will help you identify the motor power option best suited to your rangehood and cooking extraction needs.

The Perimeter Aspiration system (PA) uses an additional panel of glass or stainless steel to create a ‘venturi’ effect, which helps to capture smoke, steam, grease and oil more effectively.

Airborne particles from the cooktop are targeted to the outer perimeter of the canopy where intake is restricted, it is this narrow space which causes an increase in airflow velocity. The quicker the airborne particles are captured, the less ‘leakage’ there is into the surrounding cooking zone. This technology is particularly effective because it relies upon the high extraction power of the Schweigen silent Isodrive® motors.

Perimeter Aspiration system panels are easy to clean and open in order to access and remove the filters underneath, for safe cleaning in the dishwasher.

ENGAGE A PROFESSIONAL QUALIFIED INSTALLER

Schweigen motors have different mounting limitations due to weight and other factors. Not all motors can be mounted in the eaves for example, so make sure you check the motor manual and installation guide to ensure it meets your installation requirements. Checking with your builder or architect can also be helpful at the planning stage for a new kitchen renovation.

Installing a Schweigen silent rangehood system is a specialised task and requires a qualified, experienced professional. In order to operate correctly, the ducting must have an ‘s’ bend, which requires skill if your home has a flat roof with no cavity. We strongly recommend that you use an installer from our network or a qualified professional trades person. Please visit our website for a full list of recommended installers.

**S1 Isodrive® 650**
Weight: 2.7 kg without the PVC pipe.

**ST Isodrive® 900**
Weight: 2.5 kg without the PVC pipe.
Shutter assembly (optional) is not shown in the diagram.

The Schweigen Experience // LOCAL CUSTOMER SERVICE

There’s nothing worse than calling a company, waiting on hold forever, only to be put through to the wrong department or an entirely different country. No need to worry here at Schweigen, all of our customer service is based locally in Australia. Our service department operates through our head office in Mulgrave, Victoria, so rest assured there is always someone close by that can help you with your service needs. All of our sales calls are taken in our Perth office and distributed to the relevant department. So don’t stress about waiting on hold forever, our handy, friendly and knowledgeable team is waiting and ready to assist you.

Schweigen’s customer service team can provide a personal on-road service and installation expert straight to your door. Just look out for the bright pink and white van near you. To contact your local Schweigen expert and installer please call 1300 829 066.
The Schweigen Experience // PRODUCT DISCOVERY AND COOKING DEMONSTRATIONS SESSIONS

PRODUCT DISCOVERY SESSIONS

Not sure which product you want? Or need help with the technical details? Book yourself in for a ‘Product Discovery Session’ appointment for an exclusive walk through our range of innovative silent rangehoods and cooking appliances.

Here, we can help you finalise the details of that dream kitchen by directing you to the product that is right for you. Whether you’re looking to keep a streamlined design in your kitchen with an undermount installed into overhead cabinetry, or create a feature with a ceiling cassette in a bulkhead, we can show you a model for every design and budget.

COOKING DEMONSTRATIONS

Put your name down for a ‘Cooking Demonstration’ session to sample delicious culinary delights straight from our stunning Schweigen IN. ovens and cooktops. Held on a regular basis, in each of our showrooms nationwide, get an overview of the Schweigen products and let us treat you to a sit down meal brought to you by our network of innovative chefs.

This session is designed to help you choose your appliances and take advantage of the exclusive features. Each dish in our three course meal will highlight the best features unique to Schweigen’s extensive catalogue of silent rangehoods and appliances.

We hope to see you at the next cooking demonstration. Book in today.

Here at Schweigen, we love sharing. Whether it be a meal with friends and family, creating a space for co-workers or launching a new product, we simply love sharing.

So when the opportunity arose to share our space and product knowledge with you, we jumped at it.

We have built three high-class Schweigen showrooms in order to share our products with you. Book an appointment to visit our head office in Melbourne, walk through our showroom in Brisbane, or visit our sales office in Perth.

Each of our showrooms are equipped with a varying display of Schweigen and Schweigen IN products. Visit us in person to experience our products and see which best suits your lifestyle.
The Schweigen Experience // SHOWROOM LOCATIONS

Visit our Schweigen showrooms at the following locations:
Melbourne Head Office: Unit 8/3-4 Anzed Court, Mulgrave VIC 3170
Brisbane Office: 30 Wellington Road, Woolloongabba QLD 4102
Perth Office: Unit 4/59 Parry Street, Perth WA 6000
Visit www.schweigen.com.au/showrooms to arrange an exclusive appointment
1. WHAT MAKES THE EXTERNAL MOTOR SYSTEM BETTER THAN STANDARD INTERNAL MOTOR SYSTEMS?

The externally motored unit removes motor noise from the kitchen and transfers it outside the home. All steam, smoke and cooking odours are expelled outside, leaving your kitchen cleaner and fresher. Built with quality and precision, the Schweigen silent Isodrive© guarantees performance and reliability for years to come. Using a mere 57 watts (Isodrive® 900 motor), we deliver high powered efficiency and energy savings of more than 300%.

2. CAN THE MOTOR BE HEARD INSIDE?

Installed correctly and used at the lower speeds, Schweigen silent rangehoods cannot be heard over the ambient noise within the kitchen. At higher speeds airflow may be heard, depending on the distance of the motor from the rangehood and the type of filters selected.

3. IS IT EASY TO CLEAN THE RANGEHOOD FILTERS? HOW OFTEN DO I NEED TO CLEAN THEM?

The filters are very easy to clean and can be washed by hand or in the dishwasher.

Washing by hand – Immerse the filter in hot water and a suitable detergent; when clean, rinse with plenty of hot water. Dry the filters with a cloth after washing, avoiding leaving them to dry out by themselves.

Dishwasher – Put the filter in the dishwasher and select a short to medium program at low to moderate temperature, <60°C. (For stainless steel baffles you can use a higher temperature setting for a more thorough clean.) Do not leave filters in the dishwasher after washing, to prevent deterioration.

Please note: Stainless steel filters may lose some shine after a few cleaning processes, this is normal.

Filters should be cleaned every 3-6 weeks or after 40 hours of use. For induction cooktop, please aim to clean them at least every 10 days, depending on use.

4. WHAT ARE THE BENEFITS OF USING LED LIGHTS?

LED (light emitting diode) lighting is very energy efficient. These lights generate very little heat which means almost all of the energy they consume is turned into light. They also last a long time; approximately 50 times longer than your average incandescent bulb.

5. CAN YOU INSTALL A SCHWEIGEN SILENT RANGEHOOD IN A DOUBLE STOREY HOUSE?

Yes. It is possible to install a Schweigen silent rangehood in a double storey house. The Isodrive® motor can be mounted on an external wall, under an eave (Isodrive® 650 only), depending on the suitability of your home design. The Isodrive® 1600 is recommended for ducting requirements of 6-10 metres.

6. ARE THE MOTORS WEATHER-PROOF? CAN RAIN GET IN?

The Isodrive® motors are fitted with a water intrusion system; rain is prevented from entering the home as this patented technology effectively directs rain and water away from the housing and down the roof. Our motors have an IPX4 waterproof rating and are approved for use outside. Please see the Isodrive® Manual for more information.

7. WHAT IS THE WARRANTY ON SCHWEIGEN SILENT RANGEHOODS?

10 Year Warranty* on the Isodrive® motor and 3 Year Warranty on the canopy.

At Schweigen, we are confident enough to offer you the peace of mind of a 10 Year Warranty on the German-made motor (on all silent rangehoods equipped with the Isodrive® motor system). We also offer a 3 Year Warranty on the canopy, so you can rest assured your system will stand the test of time when you choose Schweigen.

8. WHY DO WE USE FLEXI-DUCTING?

The soft surface of Flexi-Ducting softens the noise and as a result is quieter than any other type of ducting. Our Flexi-Ducting is also fire rated where others may not be. Schweigen Flexi-Ducting is made from dual foil, heavy duty material.

9. DO RANGEHOODS HAVE TO BE VENTED OUTSIDE?

Yes. Most councils in Australia recommend that all ducted rangehoods be vented outside. Check with your local council to make sure.

If you require further information please contact the Schweigen Technical & Installation Department on 1300 829 066
