## The Silent Ventilation Experts.

Schweigen is the only 100% Australian owned climate-positive company behind bestselling silent rangehoods supporting Australian manufacturing and jobs. Our profits remain in Australia, supporting our local economy.

Designing Australia's most efficient silent rangehoods made and manufactured in Europe, we have built a reputation for providing innovative, stylish and premium appliances through more than 900+ leading retailers nationwide.

Our revolutionary **silent rangehood systems** work by removing the fan and motor from the rangehood and mounting it outside the home, so you enjoy blissful silence where you cook.

The German-made Schweigen Isodrive® motors are amongst the most energy efficient in the market, requiring just 57 watts of power to run, in comparison to competitor products which use a minimum of 180 watts.

With sleek designs, extreme durability, and versatile features, our products combine the best of European styling and Australian durability.

Silent, powerful, beautiful – what more could you want from a rangehood?

"We have built an enviable reputation by offering the finest silent rangehood solution in the market today. Our partnership with European designers and manufacturers allows us to continue to bring quality appliances with outstanding value to Australian homes."

**Anthony Fletcher.**  
Co-Owner, Schweigen

# Benefits of a Schweigen silent rangehood.

## SILENT

The Isodrive® motor is silent - removed from the rangehood and mounted outside the home.

## 10 YEAR WARRANTY

Offering customers peace of mind with a full 10 Year Warranty on all Isodrive® motors.\*

## LIFETIME FILTER WARRANTY

Easy to remove, dishwasher safe, and guaranteed for the life of the filter.\*\*

## COMPLETE VENTILATION SOLUTIONS

From indoor to outdoor rangehoods, externally mounted to in-wall motors, Schweigen has all your ventilation needs covered.

## AUSTRALIAN OWNED

We are an Australian owned, family business, that prides itself on delivering quality products built for the harsh Australian climate.

## POWERFUL

Our rangehoods extract heavy steam, smoke and unwanted cooking odours, leaving your kitchen fresher for longer.

## LIFETIME LED LIGHT REPLACEMENT

We are so confident our energy efficient LED lights will stand the test of time, we provide a replacement warranty for the life of your rangehood.\*\*\*

## CORPORATE PARTNER OF KBDI

Schweigen is proud to be a Corporate Partner for the Kitchen & Bathroom Designers Institute.

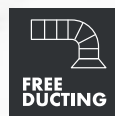

## MANUFACTURED AND ENGINEERED IN GERMANY

Built with quality and precision, the Schweigen silent Isodrive® guarantees performance and reliability for many years to come.

## ENERGY EFFICIENT

Using a mere 57 watts to deliver high powered efficiency and energy savings of more than 300%.\*\*

## FREE STEELFLEX™ DUCTING

Every silent rangehood package includes Schweigen SteelFlex™ high performance safety ducting for unbeatable value, safety and performance.

## SERVICE & INSTALLATION

An Australian based Customer Support team offers you the service and installation network you'd expect from such a premium product.\*\*\*

\* Isodrive® motor has a 10 year product warranty. This Warranty covers fan and motor units only. For more information please refer to your warranty card. Excluding the BR500. \*\* Efficiency varies between power options.

\*\*\* The period during which the Lifetime Filter Warranty is in effect will depend upon the life of your appliance. \*\*\* The period during which the Lifetime LED Light Replacement is in effect will depend upon the life of your appliance. \*\*\*\* Does not apply to remote and rural areas in Australia.

## Commitment to design, quality and innovation.

Schweigen has always been committed to providing products which focus on design excellence. To enhance the quality of kitchen designs, we strive to be a brand that you can trust. Every Schweigen rangehood is built according to the highest European standards, an assurance that we can pass onto our customers.

Simple yet elegantly designed, Schweigen rangehoods are integrated seamlessly into the modern kitchen and convey innovative technology. Current trends see island bench-tops turning the kitchen into the hub of the home. The key benefit of a silent Schweigen rangehood means you don't have to speak over a noisy appliance, making the kitchen especially inviting to family and friends.

Although silent, a Schweigen rangehood proves incredibly powerful, providing the optimal solution for the family home.

This allows for experimentation with international cuisine without the worry of lingering odours throughout the home. The commitment to design without compromising on functionality is our ethos. Therefore we are Australia's number one selling silent rangehood company.

## Schweigen – proudly Australian.

Australian owned and operated - 100% of our profits stay in Australia.

Schweigen has come a long way from its humble beginnings in Clayton, Victoria.

From engineering the first Silent Rangehood system in Australia, to being available from more than 900 stores nationwide today - our goal has always been to bring Australian families closer together, by helping them reclaim the kitchen as the hub of their home.

Along the way, we've partnered leading local players across industries to deliver

world-class products and customer service - supporting local people and jobs in manufacturing, logistics, professional trades and retail as we do so.

Schweigen is proudly Australian owned and operated. We keep all our profits here, to help our country prosper now and into the future.

So, the next time you buy Australia's number one selling Silent Rangehood, or pick from our range of award-winning appliances, rest assured that you're buying Australian, and that you're buying from the best of us.

## German engineered and manufactured.

Innovation and detail come together to create an exquisite, unique collection of rangehoods, where silence, functionality and quality are our insignia.

Schweigen sets new standards in ventilation by moving air intelligently and silently. We strive for the perfect harmony between technology, aerodynamics, and electronics. As a result of this, we produce the most powerful, efficient and silent rangehood products on the market.

Our German engineered and manufactured Isodrive® motor has been designed from the ground up, using the upmost precision. With aerodynamics and aeroacoustics being our main priority, we have collaborated with world

leaders to achieve the results we want. Continual investment in new simulation tools and testing facilities ensures every component of our product is designed to take on the harsh Australian environment.

We pride ourselves on selling products that are exceptional in durability and quality. Constructed with high quality stainless steel and using the latest in manufacturing technology, Schweigen silent rangehoods are built to last and will look amazing in years to come.

\*Schweigen products are distinguished by outstanding design and superior quality. In order to emphasise this claim, we provide a three-year guarantee for our rangehoods and a ten-year warranty for the Isodrive® motor.

We're leaving a positive trace  
#climatepositive

## A Climate Positive Organisation.

Schweigen invests in the future of the planet by carbon offsetting – supporting sustainable projects that reduce and remove emissions from the environment.

As a Climate Positive Organisation, we strive to minimise any negative environmental impact of doing business, and offset unavoidable emissions by supporting worthy climate and sustainable developments worldwide.

Schweigen is pleased to partner with Climate Tech company **trace** to become Climate Positive. **trace** is an Australian-born Climate Tech company on a mission to remove the barriers to climate action for individuals and businesses, through its accessible software platform and community.

Projects supported include; revegetation, conservation and management of unique biodiversity areas in Australia; renewable energy projects in Kenya, India, New Caledonia and Taiwan; clean water support in Rwanda; peatland conservation education projects with communities in Indonesia; supply of efficient cookstoves in Nepal.

Our Schweigen Care Program reinforces our commitment to take climate action – to minimise harm to our planet and to leave nothing but a positive trace.

| Rimba Raya Peatlands Conservation Project – Indonesia

Schweigen supports Climate Positive projects

// Sistema Biogas Kenya – energy production through the installation of biogas plants that treat animal waste into renewable biogas and fertilizer

## The Schweigen silent story.

The Schweigen silent rangehood solution is revolutionary, starting with a German fan and motor assembly, and acknowledged as the most quiet, efficient, and powerful domestic extraction unit available.

Few of our competitors can deliver a silent solution because they don't offer the same system.

We call it Isodrive®.

Schweigen's patented Isodrive® solution takes the fan and motor out of the rangehood and mounts them outside the home on the roof, wall or eave. We also incorporate an 's' bend into the flexi-ducting, which creates an easy solution for all installation requirements, while reducing noise and vibrations.

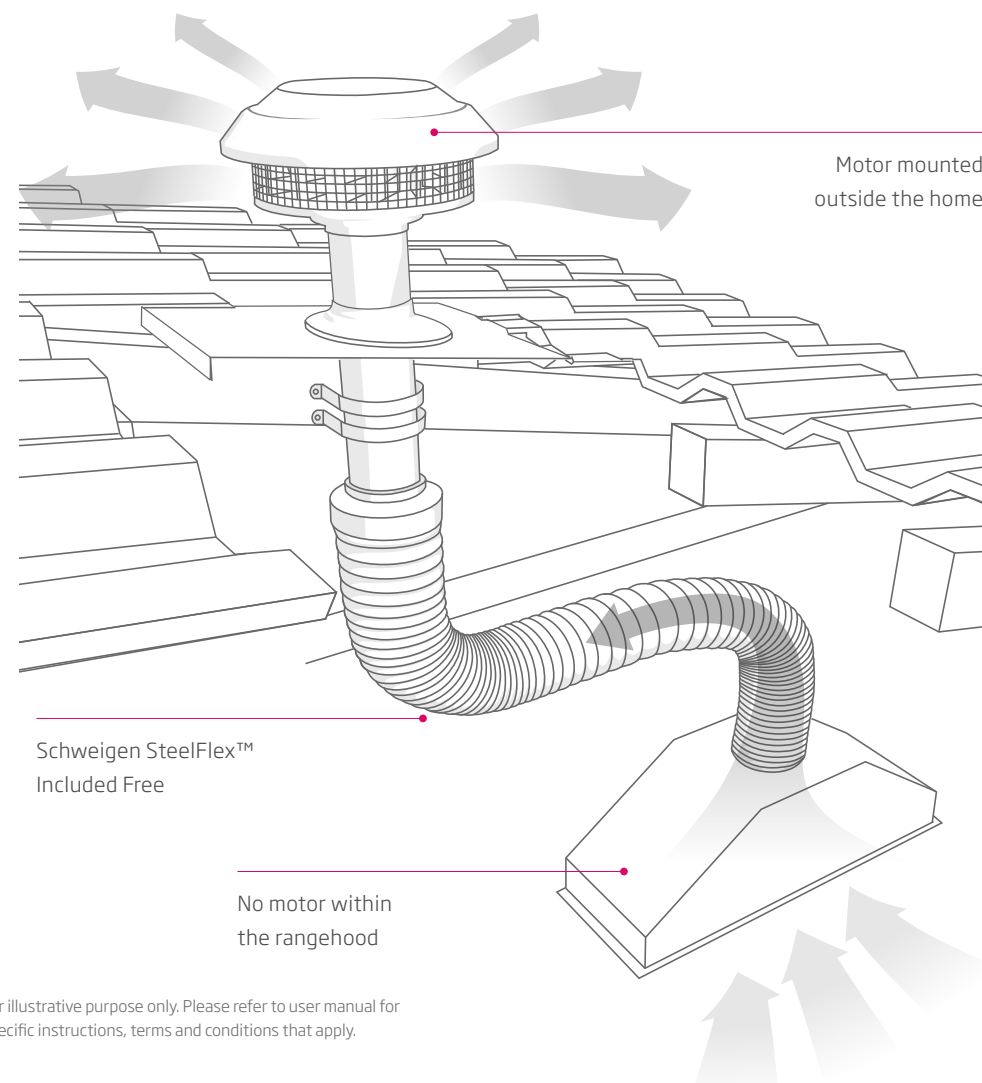

The only resulting sound you may notice in your kitchen is the airflow being pulled through the filters and ducting. The noise that is generated outside is overwhelmed by the ambient environment.

We provide a motor 'housing' to protect the motor from weather elements. It is manufactured from the most highly durable ASA plastic or Colorbond® steel exclusive to Schweigen rangehoods.

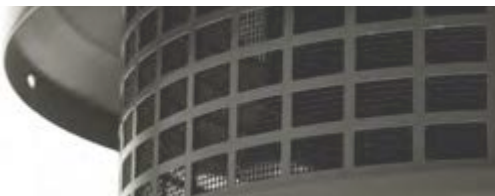

Our filters are high quality too, and come with a Lifetime Warranty. We offer baffle and mesh filters that are easy to remove and safe to clean in the dishwasher.

Powered by

GERMAN MADE

isodrive®

## Powerful extraction.

The silent Isodrive® motor system is engineered using the most advanced German made EBM motor and fan. Each of the different Isodrive® motor housing has been developed to carefully consider the best airflow. Built with a centrifugal fan, the Isodrive® motor system is designed to pull, rather than push the air through the rangehood. As a result, there is less airflow resistance, which enables the Isodrive® system to run more efficiently than a standard rangehood motor.

The patented motor system is available in five different extraction sizes to cater for all cooking needs.

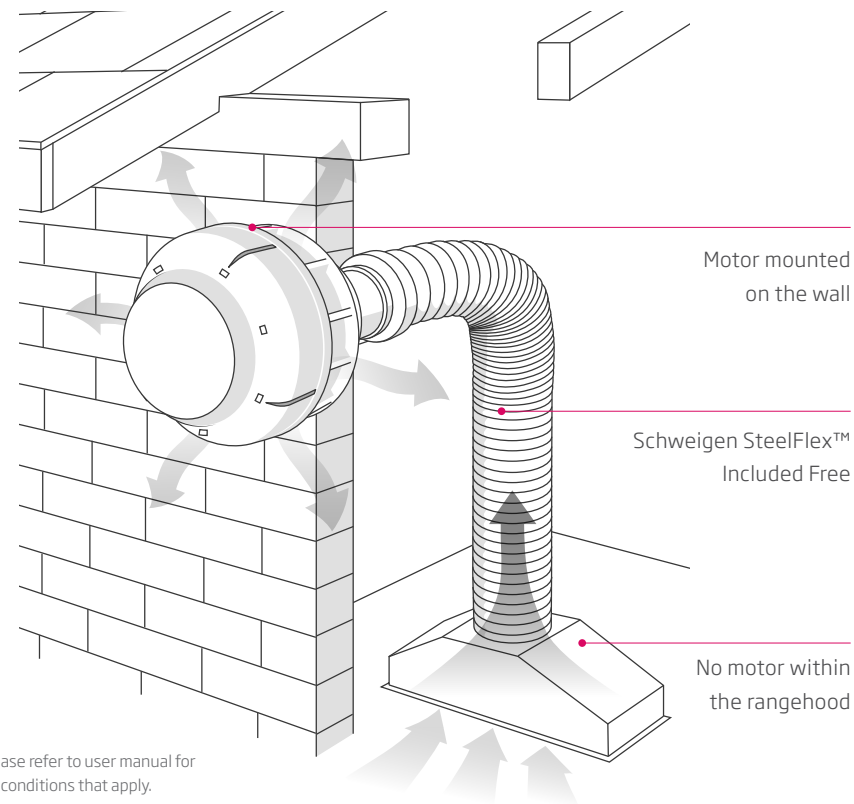

The Isodrive® ST.900 has been designed for moderate cooking including the grilling of steaks, shallow frying and casserole baking. Designed for heavy cooking such as wok frying, heavy steaming and grilling, the Isodrive® SP.1600 is the perfect match for any Asian or Indian dish, as well as induction cooking.

We have extended our silent Isodrive® range to cater for home owners where installing a motor and ducting outside the home is not possible.

The Endline Isodrive® motor is perfect for double storey buildings or apartments as it can be installed into an external wall.

For our ceiling cassette and alfresco range we offer the Isodrive® SP2.3000 and Isodrive® SE.3200 motor combinations.

Built with superior quality and precision, the Schweigen silent Isodrive® guarantees performance and reliability for years to come, that is why all Isodrive® motors come with a 10 year peace of mind warranty.

For illustrative purpose only. Please refer to user manual for specific instructions, terms and conditions that apply.

## 3 times more energy efficient.

The terms 'energy efficient' and 'suction', are often confused. Greater efficiency is often mistaken for greater suction. This is both incorrect and misleading.

Greater suction can be easily achieved by applying more power. However, an increase in power leads to the consumption of more energy, making it less energy efficient.

Ideally, an appliance that requires the least amount of energy to complete the task at hand, is the most efficient. This is where Schweigen excels. The Isodrive® motor is not only the quietest extraction

system, it is also the most energy efficient as the air is pulled through the system rather than pushed.

As a result of the Isodrive® design, the Schweigen silent rangehood systems use less energy to achieve the same task as traditional rangehoods. Traditional rangehoods use roughly 190 watts or more, whereas the Isodrive® ST.900 motor system paired with LED lighting runs on a mere 57 watts.

That's 3 times more efficient than a traditional rangehood!

### Schweigen Silent Rangehood with **Isodrive®** is 3 Times more energy efficient

FIRE  
PROOF

## Schweigen SteelFlex™ High Performance Safety Ducting.

Schweigen SteelFlex™ is an ultra-strong and flexible high-performance safety ducting made of Shirikon Firemesh® - a tri-layer tear-resistant UV-treated sleeve. Both are developed by Schweigen - the Silent Rangehood specialists, for quiet and efficient high-volume transfers of temperature-sensitive air.

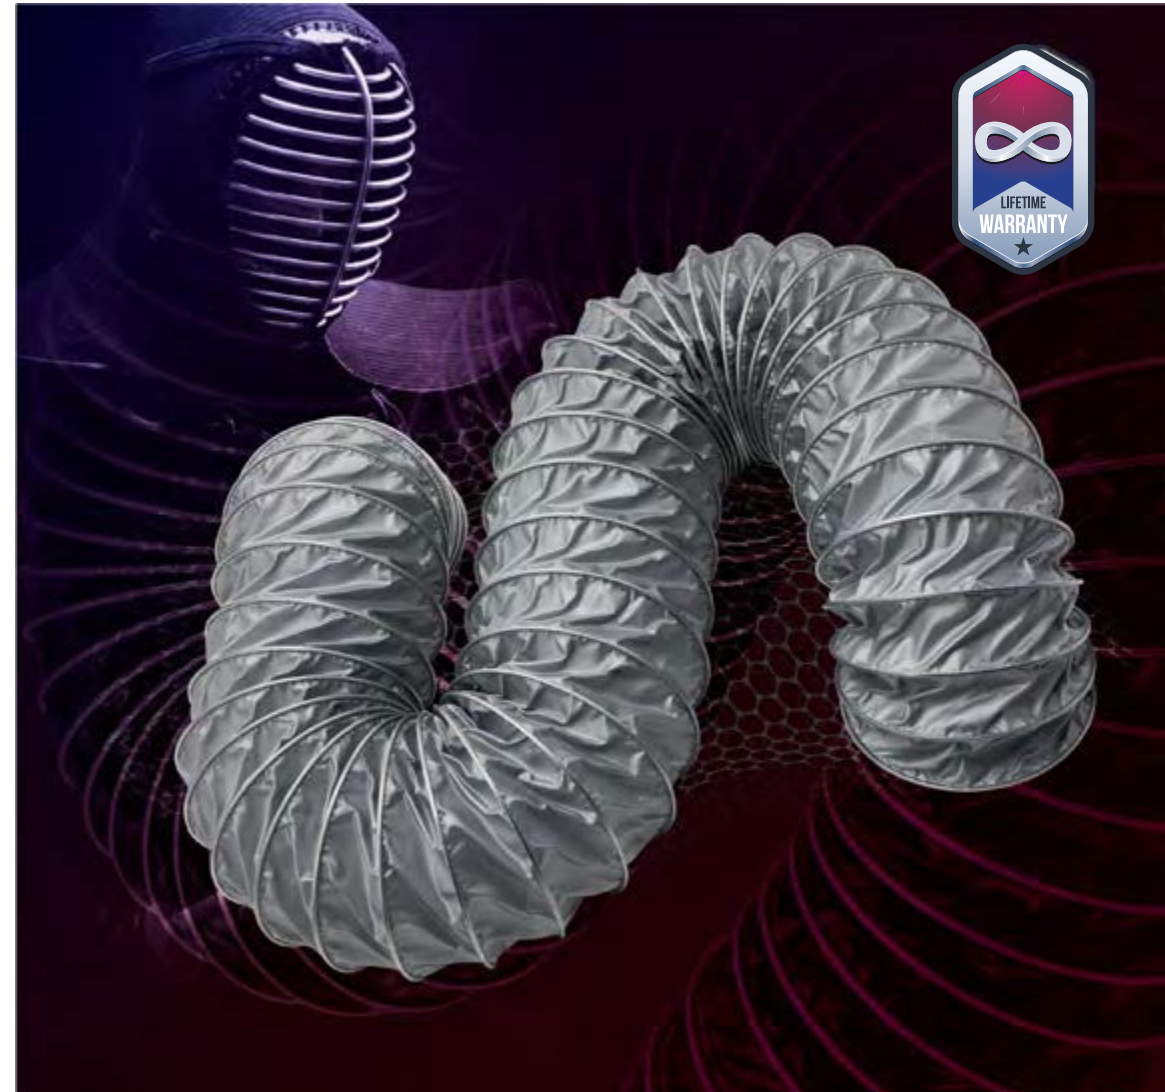

Engineered to enhance the health and safety of your home, Schweigen SteelFlex™ is antimicrobial treated, thermally insulated and acoustically dampened. It is fireproof, pest and crush proof with a treated surface that prevents the build-up of grease and bacteria.

All Schweigen SteelFlex™ products are independently tested to offer unbeatable strength and safety for the most demanding industrial and commercial HVAC applications.

Guaranteed for life\*, Schweigen SteelFlex™ works best and comes free with all Schweigen silent rangehoods powered by the German-made Isodrive® Motor System - for silent yet powerful air extraction where you cook.

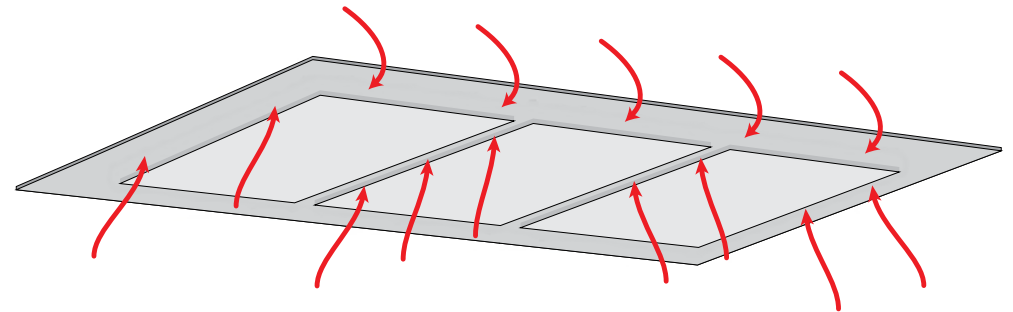

Engineered to enhance the health and safety of your family, the benefits of SteelFlex™ include:

- Treated with an advanced antimicrobial coating to resist pollutant build-up and the spread of surface bacteria
- Comes right-sized and ready-cut for quicker and safer installs by specialists and DIY enthusiasts alike
- Fire, rodent and crush-proof
- Certified, rigorous testing by an independent product testing facility.

## Perimeter Aspiration.

The **Perimeter Aspiration** system (P.A.) uses an additional panel of glass or stainless steel to create a 'venturi' effect, which helps capture smoke, steam, grease and oil more effectively.

Airborne particles from the cooktop are targeted to the outer perimeter of the canopy where intake is restricted, and it is this narrow space which causes an increase in airflow velocity. The more quickly the airborne particles are captured, the less 'leakage' there is into the surrounding cooking zone.

This technology is particularly effective because it relies upon the high extraction power of the Schweigen silent Isodrive® motors.

**Perimeter Aspiration** system panels are easy to clean and open in order to access and remove the filters underneath, for safe cleaning in the dishwasher.

*Perimeter Aspiration creates a 'venturi' effect drawing airflow to the canopy edges.*

**BA**  
BALANCED  
ASPIRATION

## Balanced Aspiration.

The **Balanced Aspiration** system (B.A.) is a breakthrough in domestic rangehood appliance technology and features exclusively on models in the Schweigen collection.

The system consists of an outer filter which captures grease and oil from airborne particles, and an inner plate.

The inner plate is perforated with strategically shaped and spaced holes which help to spread the intake of air more evenly across the filtration zone before it is extracted through the grease filter.

The plate also acts as a barrier, stopping grease from accessing inner mechanical and electrical components, making it more hygienic and safe over long term use.

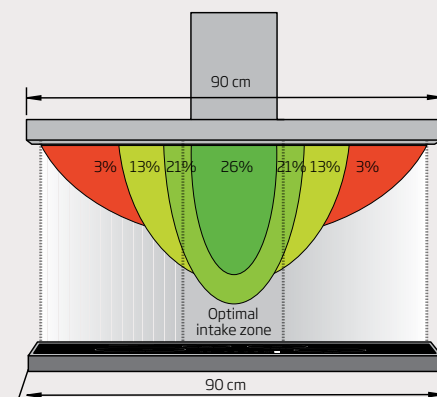

The **Balanced Aspiration** system is particularly effective because it relies upon the high extraction power of the Schweigen silent Isodrive® motor.

The outer filters are easily removed for cleaning and are dishwasher safe. Once removed, the inner plate can then be wiped clean.

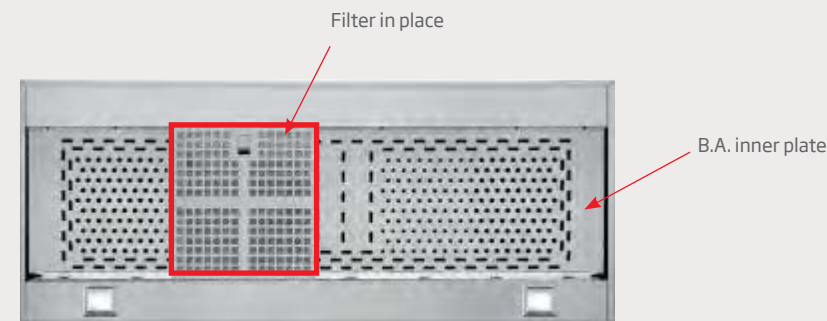

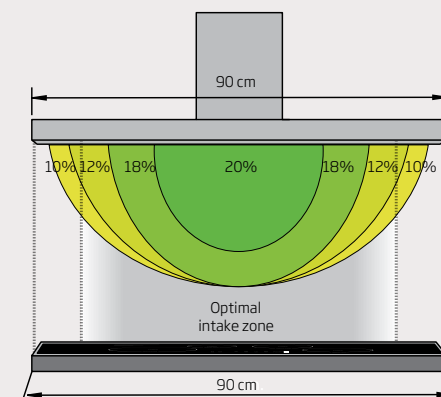

*Note: Approximate data, results of the average behaviour of all the products in the range. \*Only available on selected models.*

**TRADITIONAL**  
Optimal Intake Zone: 30% of the cooking zone.

**B. A. SYSTEM**  
Optimal Intake Zone: More than 80% of the cooking zone.\*

*B. A. System internal Details*

## The 3 steps to choosing a Schweigen **silent** rangehood.

If you have a smaller kitchen or prefer a sleek minimalist style, then you could choose one of our elegant undermount designs. If you have the space, we recommend a wallmount design. A kitchen island or peninsula bench-top layout is complimented best with an island hood or a ceiling cassette design. These can also be built into a bulkhead to create a bold statement.

The width of the rangehood needs to adequately accommodate the cooktop underneath it in order to optimise airflow extraction.

Choose a motor power option that will accommodate your cooking style: Moderate and Heavy, across the different canopy types.

1 Choose your rangehood **style**

2 Choose your cooking **type**

3 **Free ducting +** peace-of-mind warranties

## Undermount Rangehoods.

Undermount rangehoods have revolutionised the way we look at modern kitchen design. Hidden underneath cabinetry, Schweigen undermount rangehoods are neither seen nor heard as they actively extract airborne grease, oils and odours from your kitchen. The concealed design of these rangehoods is perfect for those who desire a fully integrated kitchen – enhancing continuous, sleek, modern lines.

# Catalonia // GA-600S, GA-900S, GA-1200S // 60cm, 90cm & 120cm // SILENT undermount rangehood with automatic power-off

This rangehood design offers an easy-to-clean surface with the power of Perimeter Aspiration. Available in a sleek opaque black or white glass finish, this rangehood design will integrate seamlessly with your kitchen.

## UM1170-6S, UM1170-9S // 60cm & 90cm // SILENT undermount rangehood

// UM1170-9S (90cm)

// UM1170-6S (60cm)

Perfectly designed for discreet mounting inside overhead cabinets, the popular UM1170 fits perfectly into your kitchen cupboards and is ideal for when space is limited, or where the rangehood needs to be out of sight.

Convenient stainless steel push button controls operate the 5 speed settings, LED lighting and 15 minute delay timer with auto shut-off, while dishwasher-safe mesh filters offer easy maintenance.

### DESCRIPTION

- stainless steel finish
- silent Isodrive® motor system
- soft-touch controls, digital display
- 5 x speed levels
- 15 minute delay timer with auto shut-off
- 2 x LED lights
- stainless steel, dishwasher safe filters
- 3 Year Warranty on Canopy

### MOTOR OPTIONS

#### UM-12UMS\*

- dimensions: (W x D)  
1200 x 295 mm
- 4 x baffles

### MOTOR OPTIONS

#### • ST.900

- single external motor
- 900 m³/h airflow
- 200mm SteelFlex™ ducting (4m)
- install roof/wall

#### • SP.1600

- single external motor
- 1600 m³/h airflow
- 200mm SteelFlex™ ducting (6m)
- install roof/wall

#### • SE.3200

- single external motor
- 3200 m³/h airflow
- 250mm SteelFlex™ ducting (4m)
- install roof/wall

**\*Note:** The SE.3200 is used only by the UM-12UMS.

## UM1390-6S, UM1390-9S, UM1390-12S // 60cm, 90cm & 120cm // SILENT undermount rangehood for deeper cabinets

// UM1390-9S (90cm)

// UM1390-6S (60cm)

// UM1390-12S (120cm)

Simply discreet and concealed, this most recent addition to Schweigen's classic range is specially designed for the ultimate extraction of unwanted odours and cooking vapours.

The UM1390 fits deeper into cabinetry than most other undermount rangehoods. Due to its larger extraction zone, this model is simply exceptional in the removal of fats, oils and grease, leaving your kitchen fresher for longer.

### DESCRIPTION

- stainless steel finish
- silent Isodrive® motor system
- soft-touch controls, digital display

## Wallmount Rangehoods.

When thinking of a conventional rangehood, the wallmount style is one that usually comes to mind first. Traditional and timeless in their design, wallmount rangehoods are a highly functional solution as the back wall and surrounding cabinets help direct the steam and aromas directly into the hood. Wallmounts are undoubtedly renowned for their excellent performance and continue to impress with their capacity to make a culinary statement.

## Line // WM-LIN9S // 90cm // SILENT Wallmount Rangehood with automatic power-off

// WM-LIN9S

Soft touch control panel

With its low profile and unobtrusive style, the LINE rangehood silently whisks away airborne particles using the advanced Balanced Aspiration airflow system.

## UM4220-12S, UM422G-12S // 120cm // SILENT Ceiling Cassette

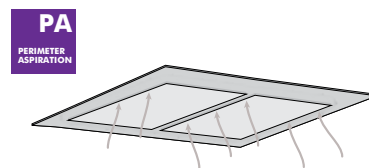

// UM422G-12S

The UM422G-12S ceiling cassette is a combination of innovative silent technology and sleek, modern kitchen styling. The ceiling cassette is finished in stainless steel with black glass doors, making it both aesthetically pleasing and practical in its performance. Featuring 6 down-lights, your cooking area is completely illuminated while you cook for your guests.

// Remote control

// Perimeter Aspiration Technology

// UM4220-12S

One of the advantages of this ceiling cassette is the use of Perimeter Aspiration which targets air extraction towards the perimeter of the cassette creating a smaller and more intense extraction area. Remote control easily operates the ceiling cassette with the added benefit of a 15 minute automatic delay timer.

### DESCRIPTION

- black glass or stainless steel finish
- ceiling/bulkhead cassette rangehood
- silent Isodrive® motor system
- Perimeter Aspiration
- remote control operation\*
- 4 x speed levels
- 15 minute delay timer with auto shut-off
- 6 x LED down lights

## Island Rangehoods.

Due to the increase of open-plan living, entertaining for family and friends has been taken to the next level. Island kitchens have evolved as the ideal kitchen design solution, playing an essential role in complimenting your social lifestyle. Not only does an island canopy enhance the art of entertaining, it makes for an outstanding kitchen feature. Schweigen's island range stands as the most silent, powerful and efficient on the market.

## IS4110S // 90cm // SILENT Island Rangehood

  - install roof/wall

### TECHNICAL DATA

#### IS4110S

- dimensions: (W x D)  
898 x 660 mm
- 4 x mesh filters

You couldn't ask for more with this strikingly designed rangehood. Adapting European design and German engineered silent technology, the IS4110S is less bulky than many of the traditional style rangehoods. As most canopies tend to make a room feel smaller, the IS4110S does the opposite and

is able to open up an entire kitchen space. The angular look of this rangehood has become extremely popular in modern kitchens, boasting features such as soft-touch eye level controls, stainless steel finish and a 15 minute delay timer with automatic shut-off.

## Schweigen Focus // OPEN-PLAN LIVING // Island bench-top

In modern times, kitchen layout has been revolutionised by the way we engage with each other in the dining space. Cultural and societal views of the 1950's had fundamental influence on separating cooking and dining areas in the home. However, there started to become a demand for communal living, perhaps mostly related to the era of the baby-boomers. Architect and Interior Designer, Frank Lloyd Wright, discovered a reason and solution for our fascination and growing interest, therefore creating the Kitchen Island.

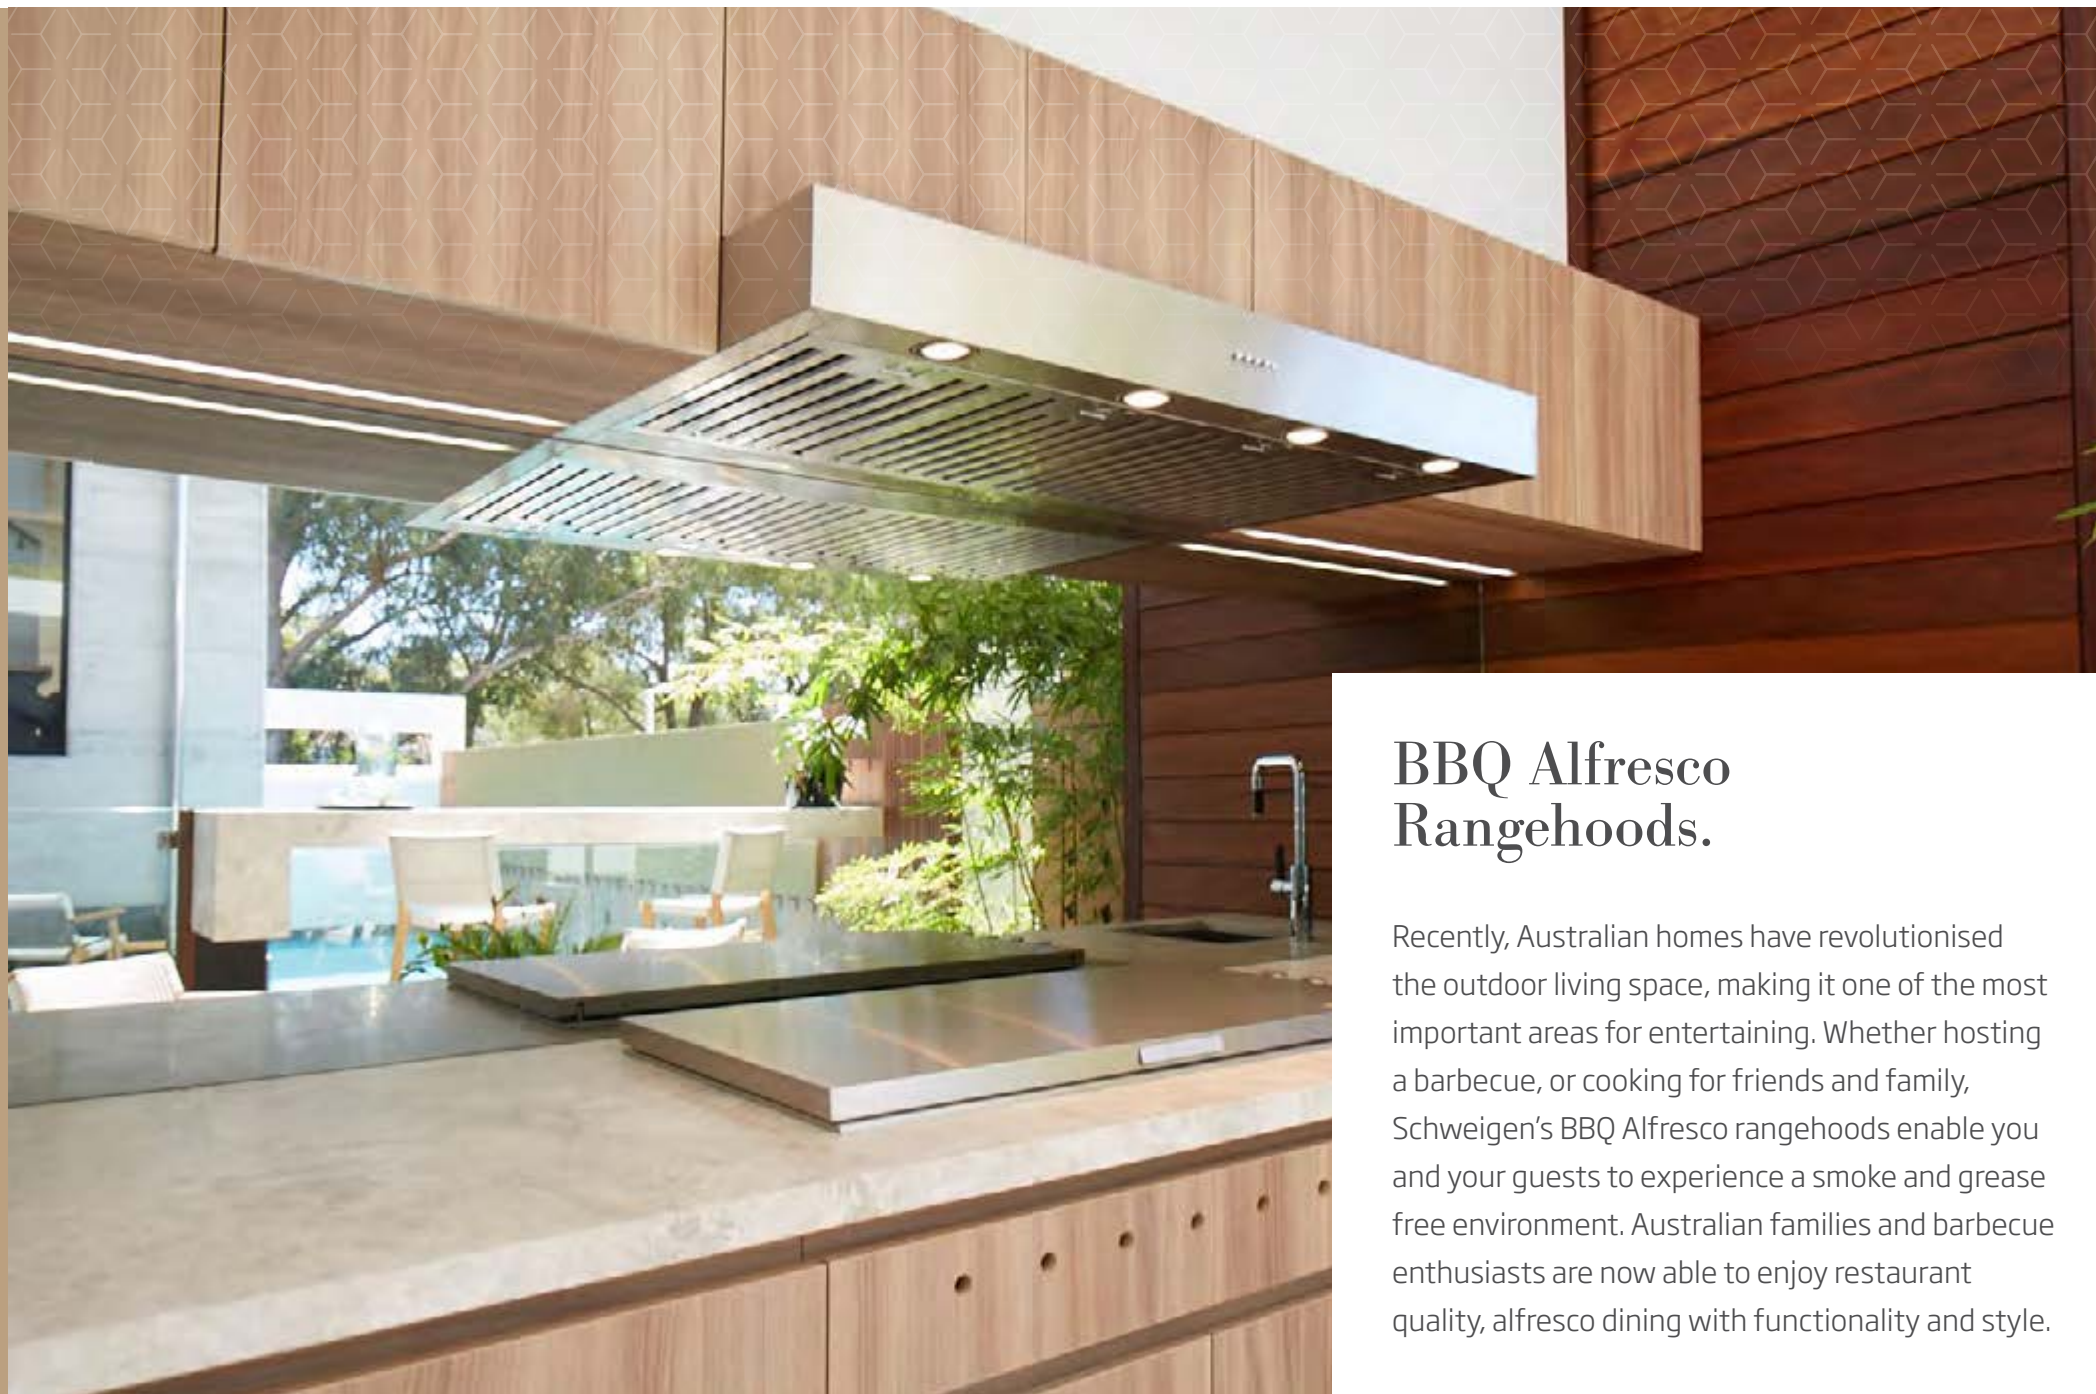

Technological influences allowed for shifts in design trends and more advanced kitchen appliances. The concept of cooking as a way of bringing friends and family together to entertain and socialise, led to open-plan living - integrating cooking with dining. The development of Interior Design has formed Island Kitchens into all different shapes, sizes and heights, reinventing the style of how we dine and utilise space.

With Island bench-tops being increasingly popular, there has been a demand for the correct ventilation to compliment this design. Island canopies and ceiling cassettes have proved to be the most popular, not only removing oils, grease and odours, but as a design statement to enhance any kitchen. Consequentially, the innovation of ceiling cassettes has become increasingly popular with kitchen designers travelling back to the original concept of creating space with open-plan living.

## BBQ Alfresco Rangehoods.

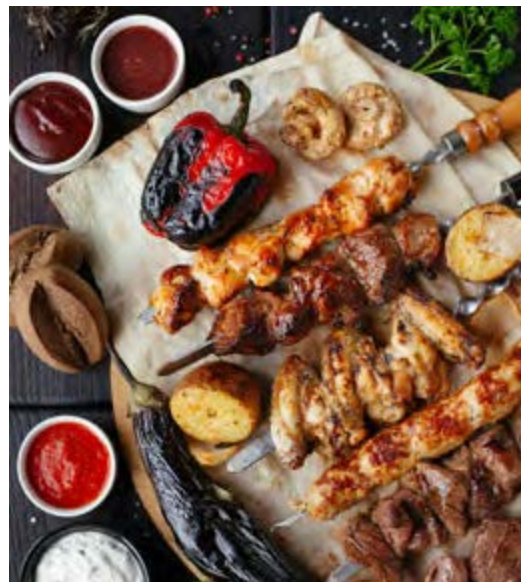

Recently, Australian homes have revolutionised the outdoor living space, making it one of the most important areas for entertaining. Whether hosting a barbecue, or cooking for friends and family, Schweigen's BBQ Alfresco rangehoods enable you and your guests to experience a smoke and grease free environment. Australian families and barbecue enthusiasts are now able to enjoy restaurant quality, alfresco dining with functionality and style.

## CLUM12S, CLUM15S // 120cm & 150cm // SILENT BBQ Alfresco Rangehood undermount

// CLUM12S

// CLUM15S

The CLUM12S or CLUM15S undermount rangehood boasts power, innovative design and durability. Constructed with high grade 304 stainless steel, this silent alfresco rangehood is designed for outdoor and under-cover patio use.

Its sleek design integrates seamlessly into overhead cabinetry and comes with sensitive touch buttons, remote control and

10-minute auto-shutoff function. There are 4 speed levels powered by the Isodrive® motor system for swift and silent extraction of heavy smoke and airborne grease from any Australian barbecue.

### DESCRIPTION

- quality 304 grade stainless steel
- silent Isodrive® motor
- 4 speed touch sensitive controls
- 10 minute auto shut off
- GU10 LED lights with a lifetime warranty
- dishwasher safe, commercial grade baffle filters
- 3 Year rangehood Warranty

## CL7272S, CL7275S // 120cm & 150cm // BBQ Alfresco Rangehood wallmount

// CL7272S (120cm)

When it comes to outdoor living, the CL7272S & CL7275S pride themselves on delivering optimal performance and precision. Using Schweigen's German Engineered Isodrive® technology, these stunning rangehoods bring powerful yet silent extraction to your cooking environment. Most notably, the CL7272S & CL7275S make a statement in design with their clean, modern

lines and simple geometric shapes. Using robust high grade 304 stainless steel, these models deliver durability and excellence for any outdoor space or under-cover patio. These grand wallmounts are for entertainers who want to make a bold statement in their outdoor living area.

### DESCRIPTION

- quality 304 grade stainless steel
- silent Isodrive® motor system
- 3 speed push button control
- 4 x GU10 halogen lights
- dishwasher safe, commercial grade baffles
- 3 Year Warranty on rangehood

### MOTOR OPTIONS

- **SP2.3000**
  - twin external motor
  - 3000 m³/h airflow
  - 200mm SteelFlex™ ducting (6m)
  - install roof/wall
- **SE.3200**
  - single external motor
  - 3200 m³/h airflow
  - 250mm SteelFlex™ ducting (4m)
  - install roof/wall

### TECHNICAL DATA

#### CL7272S

- dimensions: (W x D)  
1200 x 700 mm
- 4 x baffles

#### CL7275S

- dimensions: (W x D)  
1500 x 700 mm
- 5 x baffles

**\*Note:** Best suited with drop-in flush-mounted barbecues and models with shallow lids.

## CL8812, CL8815 // 120cm & 150cm // BBQ Alfresco Rangehood wallmount with twin in-built motors

// CL8812 (120cm)

// CL8815 (150cm)

This incredibly powerful, stately wallmount rangehood comes in two measurement options of 120cm & 150cm. With twin, in-built motors providing a powerful airflow of 2700m<sup>3</sup>/hr, these rangehoods boast a match of performance with visual appeal. The CL8812 & CL8815 are built with the highest

quality, robust stainless steel, and are specifically designed to withstand the harsh Australian environment. The innovative pyramid design consists of a considerably large extraction zone, effectively capturing smoke and grease over any barbecue with the touch of easy-push button controls.

### DESCRIPTION

- quality 304 grade stainless steel
- 3 speed eye level push button control
- 3 x LED lights
- dishwasher safe, commercial grade baffles
- 3 Year Warranty

### MOTOR OPTIONS

- in-built twin motors
- 2700 m<sup>3</sup>/h airflow

### TECHNICAL DATA

- 5 x baffles

## CLUM10, CLUM12 // 100cm & 120cm // BBQ Alfresco Rangehood undermount with twin in-built motors

// CLUM12 (120cm)

// 3 speed push button controls

// CLUM10 (100cm)

Schweigen's undermount CLUM10 & CLUM12 boast power, innovative design and durability. Using only the finest 304 grade stainless steel, these alfresco rangehoods are made considerably more durable for use in an outdoor room or under-cover patio. Their sleek, undermount design integrates

seamlessly into any alfresco cabinetry and outdoor dining area. With easy-to-use, push button controls, you are able to choose from 3 powerful speed levels originating from the twin, in-built motors. The CLUM10 & CLUM12 ensure efficient extraction of heavy smoke and grease created from any Australian barbecue.

**in-built

## CL6272 // 120cm // BBQ Alfresco Rangehood wallmount with twin in-built motors

// CL6272

The CL6272 wallmount alfresco rangehood prides itself on being a pyramid of excellence. Focusing on modern demands of alfresco dining, this model accentuates innovation, power and quality. Using high grade 304 stainless steel, this canopy is more durable for use in an outdoor room or under-cover patio.

With twin, in-built motors, the CL6272 provides a powerful 2200m³/hr of airflow, delivering efficient extraction of steam and smoke to make for a fresh, clean outdoor living space.

### DESCRIPTION

- quality 304 grade stainless steel
- 3 speed push button control
- 2 x GU10 halogen lights
- dishwasher safe, commercial grade baffles
- 3 Year Warranty

## Silent Exhaust Fans.

Available in a range of vent styles and finishes, Schweigen Silent Exhaust Fans are powered by the energy-efficient Isodrive® motor that is designed to be installed through the roof or wall. They are suitable for use in almost any room in your apartment, townhouse, single or multi-storey house to help deal with odour, moisture and ventilation issues.

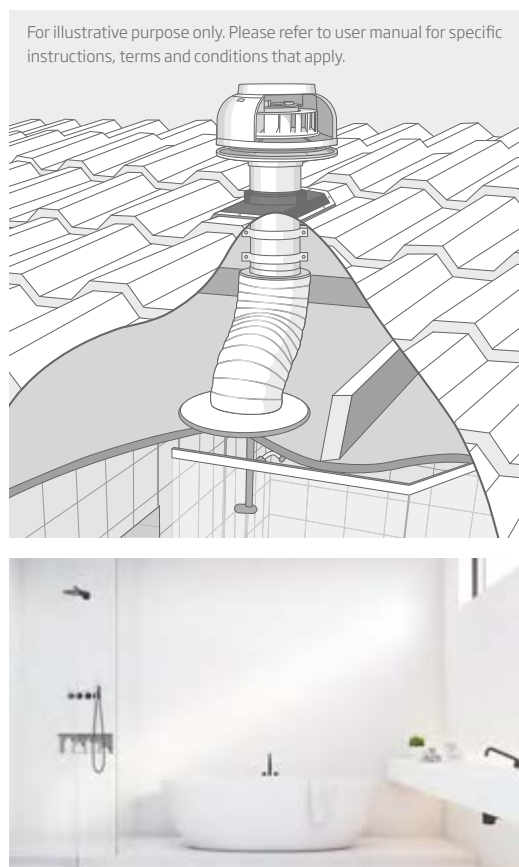

## BR500, BR500ST // SILENT Multi-Purpose Exhaust Fan

Ideal for every household, this unit can be installed and vented into two rooms – by utilising the optional DVK500 kit. With silent operation, your bathroom and laundry will stay fresh and odour-free.

The revolution starts with a German made EBM motor and fan which is recognised as the quietest, most efficient and highest-

powered domestic extraction unit available today. However, even the quietest motors and fans on the market still generate noise. Using Schweigen's renowned concept of placing the motors externally on your roof or eaves, you can easily achieve silent operation of all household extraction units.

For illustrative purpose only. Please refer to user manual for specific instructions, terms and conditions that apply.

### DESCRIPTION

- Universal mounting options - Roof/Wall/Eaves
- Patented anti-water intrusion, weather protection system (IPX4 rated)
- Acoustic dome with super quiet, long vane, backward curved centrifugal fan
- Motor can be mounted up to 3 metres from the vent
- 5 Year Warranty on the motor
- Can be installed and vented to 2 adjacent rooms with the optional DVK500 kit

### TECHNICAL DATA

#### BR500

- Motor includes:
  - Fan Module
  - Exhaust Vent
  - Bell Mouth Adaptor
  - 100mm Pipe
  - Flexible Ducting (3m)
  - Back Draught Shutter System
  - Instruction Manual

#### MOTOR OPTIONS

- **S1.650**
  - single external motor
  - 650 m<sup>3</sup>/h airflow
  - 150mm flexi ducting (4m)
  - install roof/wall/eaves
- **ST.900**
  - single external motor
  - 900 m<sup>3</sup>/h airflow
  - 200mm flexi ducting (4m)
  - install roof/wall

Both the BR500 and DVK500 are now available together in one convenient bundle called the BR522.

## BRW600 // SILENT Multi-Purpose Exhaust Fan

The Isodrive®-powered silent exhaust fan whisks away odours, steam, stale air and humidity in seconds with 650m<sup>3</sup>/hr airflow – efficiently reducing airborne bacteria and preventing mould growth.

Designed to be installed through the roof, wall or eave and suitable for almost any room in your unit, apartment, townhouse, single or multi-storey house – the BRW600 can also be vented to 2 adjacent rooms with the optional DVK600 kit.

### DESCRIPTION

- Universal mounting options - Roof/Wall/Eaves
- Patented anti-water intrusion, weather protection system (IPX4 rated)

- install roof/wall

Both the BRB700 and DVK700 are now available together in one convenient bundle called the BRW722.

# Isodrive® Motor Range // SILENT EXTERNAL MOTOR

## SELECTING THE RIGHT SILENT RANGEHOOD MOTOR

To maximise the performance of your rangehood, it is important to select a motor power option that suits the cooking technique you use the most.

Dishes high in spice ingredients or with intense smoke generated from a wok or grill, require much stronger extraction power to perform effectively.

The table below will help you identify the motor power option best suited to your rangehood and cooking extraction needs.

Schweigen Silent Rangehood with **Isodrive®** is 3 Times more energy efficient

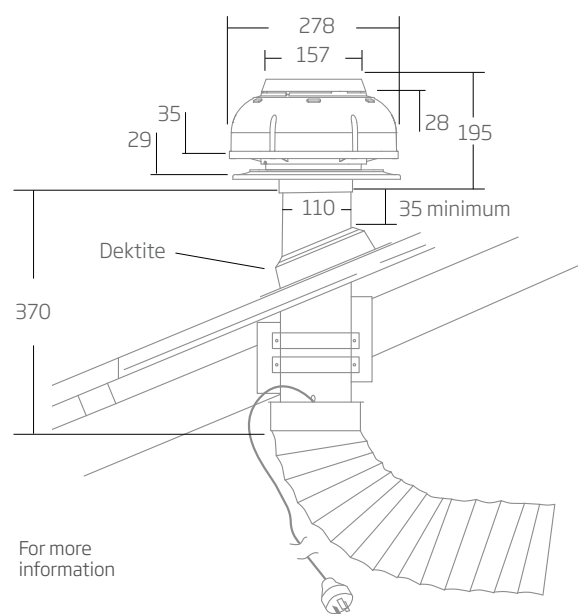

## ENGAGE A PROFESSIONAL QUALIFIED INSTALLER

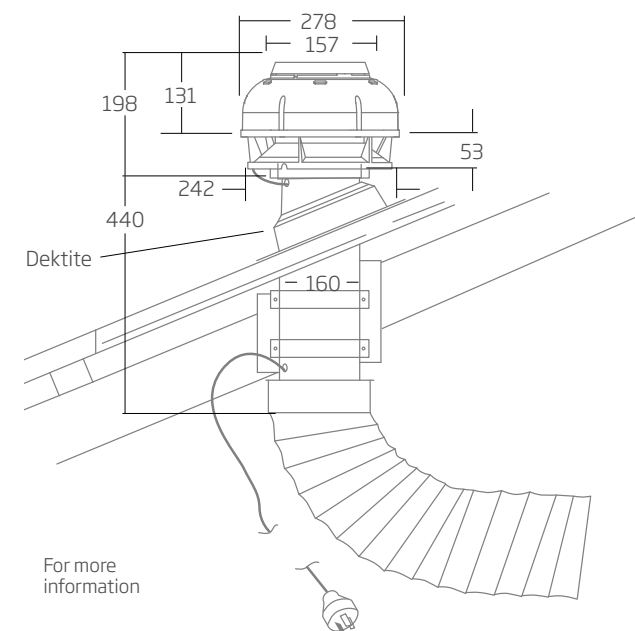

Schweigen motors have different mounting limitations due to weight and other factors. Not all motors can be mounted in the eaves for example, so make sure you check the motor manual and installation guide to ensure it meets your installation requirements. Checking with your builder or architect can also be helpful at the planning stage for a new kitchen renovation.

Installing a Schweigen silent rangehood system is a specialised task and requires a qualified, experienced professional. In order to operate correctly, the ducting must have an 's' bend, which requires skill if your home has a flat roof with no cavity. We strongly recommend that you use an installer from our network or a qualified professional trades person. Please visit our website for a full list of recommended installers.

Isodrive® **S1.650** (Silent exhaust fan only)  
Weight: 2.7 kg without the PVC pipe.

Isodrive® **ST.900**  
Weight: 2.5 kg without the PVC pipe.

# The Schweigen Experience // **BREATHE BETTER WITH SCHWEIGEN SILENT EXHAUST FANS**

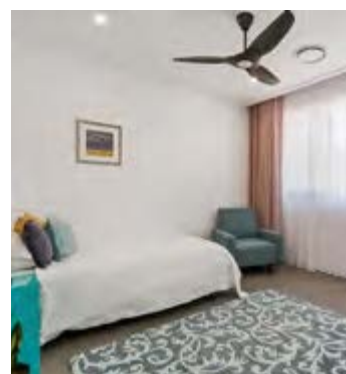

## **NOW YOU CAN SAY NO TO MOULD WITH EVEN MORE CHOICE OF MOTORS AND BUNDLED OPTIONS FROM SCHWEIGEN'S RANGE OF SILENT EXHAUST FANS.**

Schweigen's silent exhaust fans prevent mould build-up by swiftly and silent removing steam, odours and airborne bacteria without the use of harmful chemicals - leaving your living space cleaner and fresher for longer.

They are designed to be installed through the roof, wall or eave and suitable for almost any room in your unit, apartment, townhouse, single or multi-storey house - and are uniquely powered by the German-made Isodrive® motor (recognised as one of the quietest, most efficient and powerful domestic air extraction units available today).

These silent yet powerful units now whisk away odours, steam, stale air and humidity in seconds with a choice of 650 or 900m<sup>3</sup>/hr airflow. Each exhaust fan can also vent 2 adjacent rooms with an optional venting kit and are now available together in your choice of all-in-one bundles for hassle-free installations.

- **Powerful silent extraction** by the German-manufactured Isodrive® Motor System designed to be mounted outside the home for silent operation indoors.
- **Multi-purpose ventilation** suitable for use anywhere in the house - to remove steam from bathrooms, odours from toilets, condensation from laundry rooms, stale air from bedrooms, garage, wine cellar and more.
- **Multi-room extraction** from just one exhaust fan with whole of house multi-room models and venting kits now available as easy-to-install bundles.
- **More extraction power** options to suit your needs with 650 or 900m<sup>3</sup>/hr airflow.
- **Flexible installation** through the roof, wall or eave of your apartment, townhouse, single or multi-storey house.

# Frequently Asked Questions // SCHWEIGEN CUSTOMER SERVICE

## 1. WHAT MAKES THE EXTERNAL MOTOR SYSTEM BETTER THAN STANDARD INTERNAL MOTOR SYSTEMS?

The externally motored unit removes motor noise from the kitchen and transfers it outside the home. All steam, smoke and cooking odours are expelled outside, leaving your kitchen cleaner and fresher. Built with quality and precision, the Schweigen silent Isodrive® guarantees performance and reliability for years to come. Using a mere 57 watts (Isodrive® 900 motor), we deliver high powered efficiency and energy savings of more than 300%.

## 2. CAN THE MOTOR BE HEARD INSIDE?

Installed correctly and used at the lower speeds, Schweigen silent rangehoods cannot be heard over the ambient noise within the kitchen. At higher speeds airflow may be heard, depending on the distance of the motor from the rangehood and the type of filters selected.

## 3. IS IT EASY TO CLEAN THE RANGEHOOD FILTERS? HOW OFTEN DO I NEED TO CLEAN THEM?

The filters are very easy to clean and can be washed by hand or in the dishwasher.

**Washing by hand** – Immerse the filter in hot water and a suitable detergent; when clean, rinse with plenty of hot water. Dry the filters with a cloth after washing, avoid leaving them to dry out by themselves.

**Dishwasher** – Put the filter in the dishwasher and select a short to medium program at low to moderate temperature, < 60C. (For stainless steel baffles you can use a higher

temperature setting for a more thorough clean.) Do not leave filters in the dishwasher after washing, to prevent deterioration.

**Please note:** Stainless steel filters may lose some shine after a few cleaning processes, this is normal.

Filters should be cleaned every 3-6 weeks or after 40 hours of use. For induction cooktop, please aim to clean them at least every 10 days, depending on use.

## 4. WHAT ARE THE BENEFITS OF USING LED LIGHTS?

LED (light emitting diode) lighting is very energy efficient. These lights generate very little heat which means almost all of the energy they consume is turned into light. They also last a long time; approximately 50 times longer than your average incandescent bulb.

## 5. CAN YOU INSTALL A SCHWEIGEN SILENT RANGEHOOD IN A DOUBLE STOREY HOUSE?

**Yes.** It is possible to install a Schweigen silent rangehood in a double storey house. The Isodrive® motor can be mounted on an external wall, under an eave (Isodrive® 650 only), depending on the suitability of your home design. The Isodrive® 1600 is recommended for ducting requirements of 6-10 metres.

## 6. ARE THE MOTORS WEATHER-PROOF? CAN RAIN GET IN?

The Isodrive® motors are fitted with a water intrusion system; rain is prevented from entering the home as this patented

technology effectively directs rain and water away from the housing and down the roof. Our motors have an IPX4 waterproof rating and are approved for use outside. Please see the Isodrive® Manual for more information.

## 7. WHAT IS THE WARRANTY ON SCHWEIGEN SILENT RANGEHOODS?

10 Year Warranty\* on the Isodrive® motor and 3 Year Warranty on the canopy.

At Schweigen, we are confident enough to offer you the peace of mind of a 10 Year Warranty on the German-made motor (on all silent rangehoods equipped with the Isodrive® motor system). We also offer a 3 Year Warranty on the canopy, so you can rest assured your system will stand the test of time when you choose Schweigen.

## 8. WHY DO WE USE STEELFLEX™ DUCTING?

The soft surface of SteelFlex™ Ducting softens the noise and as a result is quieter than any other type of ducting. Our SteelFlex™ Ducting is also fire rated where others may not be. Schweigen SteelFlex™ Ducting is made from dual foil, heavy duty material.

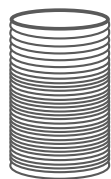

## 9. DO RANGEHOODS HAVE TO BE VENTED OUTSIDE?

**Yes.** Most councils in Australia recommend that all ducted rangehoods be vented outside. Check with your local council to make sure.

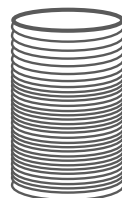

If you require further information please contact the Schweigen Technical & Installation Department on **1300 829 066**

\*BR500 is excluded from the 10 Year Warranty
