RE: Design Works Engineering Acquires Vital Engineering & 3D Energy Limited

Dear Valued Clients,

Today we announce some exciting news: Design Works Engineering has completed the acquisition of all existing engineering projects previously undertaken by Vital Engineering and 3D Energy Limited; an Edmonton-based firm whose services include: mechanical engineering, electrical engineering, sustainable design, retro-commissioning, energy engineering, energy management, and project management. Their President & CEO Dean Turgeon states:

"This year, Vital celebrated 20 years of service. In those years there have not been many days that are more significant than today. The combined forces of Vital Engineering, 3D Energy, and Design Works Engineering creates a significant opportunity for not only business continuity but also for expansion into other regional markets with an even more robust and diverse service offering. I look forward to welcoming the staff and clients personally to introduce this opportunity to be a part of the next chapter of our combined organizations."

Further to this, we are excited to welcome Vital Engineering & 3D Energy staff to Design Works Engineering.

Design Works Engineering is a full-service, national engineering firm, providing mechanical engineering, electrical engineering, structural engineering, civil engineering, energy modelling, and sprinkler design. The addition of Vital Engineering's and 3D Energy portfolio will benefit the staff and clientele of both Vital Engineering and Design Works Engineering.

These acquisitions provide Design Works with a larger mechanical and electrical engineering team with a broad range of experience in sustainable design. Design Works has always been committed to creating sustainable buildings, and with the addition of new team members, we can further achieve this goal.

As we complete this integration, please be assured that we are committed to continuing to provide the same high-quality design services you have become accustomed to. We will work closely with our clients, partners, and employees to make this transition as smooth as possible.

Vital Engineering & 3D Energy existing projects are now fully owned by Design Works Engineering Ltd.

"Acquiring these projects was an easy decision given how the work will complement the Design Works team. I look forward to working with the entire team as we grow together creating sustainable and innovative projects."

- Haydar Al Dahhan, President & CEO of Design Works Engineering
