## Asset Allocation

## Swing Factors

Fusion Alpha H5 is actively managed using a 30% swing factor around its strategic targets. This allows us to respond to the investment climate, reducing risk during periods of turbulence and increasing it during periods of growth.

## Investment Commentary

The market gains seen in April were consolidated and continued in May, with markets able to look beyond the negative macro data from the world's leading economies. Likewise, the dramatic falls seen in the oil markets were reversed with a sustained price recovery through the month.

These gains were against a backdrop of the US unemployment rate touching nearly 20 percent, retail sales plummeting and most corporates withdrawing their guidance on future earnings & outlook.

Optimism was reinforced as lockdown measures were relaxed and news on possible vaccines drove increased investor's risk appetite.

As in April, Fusion portfolios significantly outperformed the ARC benchmark in May.

The investment team are focussing on any opportunities that may have been left behind as the market has staged this recovery.

## Strategy Overview

In pursuit of attractive targeted returns, Fusion invests in a broad range of asset classes designed to maximise its ability to deliver returns whilst minimising the associated risk.

The Fusion Strategies are constructed around a managed portfolio of collective investment schemes, delivering a unique combination of diversification, flexibility and efficiency.

Fusion Alpha H5 Strategy is designed for investors who are prepared to accept a moderate level of risk to achieve higher potential returns:

The strategy balances a strategic exposure to equities and other higher risk investments, with a lesser weighting to lower risk investment asset classes.

Targets a strategic currency exposure of 80% in the portfolio base currency.

Five year rolling investment horizon, allowing for greater exposure to higher risk assets and the potential to achieve higher returns.

The information contained herein is believed to be correct, but its accuracy cannot be guaranteed. Performance is calculated based on the average actual performance of Fusion portfolios. Individual Fusion portfolios can vary from the average. Any reference to past performance is not necessarily a guide to the future. The information contained in this document is provided solely to enable the customer to make their own investment decisions. A composite benchmark has been used from inception until December 2011 and from that point a more representative private client index, based on real performance numbers provided by participating investment managers, has been used. This document has been prepared for information purposes only and does not constitute an offer or an invitation, by or on behalf of any company within the Capital International Group of companies or any associated company, to buy or sell any security. Nor does it form a constituent part of any contract that may be entered into between us. The price of a security may go down as well as up and its value may be adversely affected by currency fluctuations. Full terms and conditions of Fusion are contained in the Brochure, Terms of Business and associated literature which is available upon request.
