

# Lamitex<sup>®</sup>

## For High Voltage Insulation

### Lamitex<sup>®</sup> materials

are renowned in many industries for electrical insulation, as our quality material and expert fabrication are among the elite in the business. Supplying a range of materials and services to small and large businesses alike, we believe that we can satisfy everyone's objectives.

### *Typical electrical insulation applications include but are not*

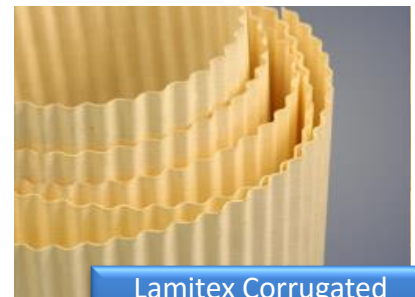

*limited to:* Fuse tubes, switch insulation, tap changer shafts, isolator pads, coil forms, antennas, mounting boards, standoff insulators, arc chutes, electrode clamps, bolt caps, cams, electric box liners, electrical grid bushings, tap changer terminal boards, and electrode arm insulation.

Custom machined NEMA grade GPO3 (Glass Polyester)

Custom machined Lamitex G-10 Glass-Epoxy board

Lamitex Corrugated Insulation

***Why Corrugated Insulation Matters:*** Wrapping corrugated insulation around your transformer will not only increase the surface area of your insulation, but will also cut down the time that it takes to wrap each transformer, and time is money!
