## Driving Practice Success in a New Era...

**Friday, December 4, 2020** 10:00am–3:30pm (Registration/breakfast opens 9:00am, refreshments & networking immediately following program)

While 2020 has forced us to re-think what we do and how we do it, the truth is that dentistry has been under pressure to change for years now. New materials, new patient expectations, new technologies, combined with declining reimbursements, increased overhead costs, and a commoditization of our profession have many clinicians troubled and confused about where to go next with their practice, and rightfully so.

Fortunately, change doesn't have to be a bad thing. The truth is that many of the developments in workflows and armamentarium today can lead to providing patients with better, more efficient, cost-effective solutions than ever before. Come join the Planmeca Digital Academy for a hands-on look at how you can embrace the change and ensure practice success in this new era of dentistry. In this course, we will:

In partnership with

### OBJECTIVES

- Discuss the critical changes in our profession that make "digital dentistry" a misnomer in 2020; Dentistry IS digital!
- Explore the benefits of digitizing what you do now in your practice to improve patient outcomes and maximize practice efficiency and profitability
- Take an in depth look at current restorative materials and understand how to leverage them for best results and predictability in your practice
- Experiment with intraoral scanning, digital workflows and esthetic materials management to determine what works best for your practice and your patients

### REGISTER TODAY!

Seating is limited to the **first 25 registrants**
